Measuring Your Fingers

To determine if a Your Dream fits in an Allen handgun case, you have two options:

1. Measure the barrel length of your firearm and use the charts for Compact/Sub-Compact Semi-Automatics, Full Size Semi-Automatics, or Double Action Only Revolvers to find your case.
2. Measure the full length of your firearm and use the dimensions of the gun case itself to find the right fit. (after gun cases are sorted by their internal dimensions. For example, an 11" Case has an internal length of 11".)
