Weightless. Limitless.

Developing UltraCarbon™ technology for the Hypercraft® model led to expanding the benefits of its strength and weight savings into our Active Performance range with our two new Legere models. Utilizing the same UltraCarbon™ technologies, we've designed the Legere® to be the new everyday favorite sunglasses for active and style-conscious athletes. The unisex silhouette of the single shield lens is enhanced by the detailed etching around the perimeter, giving it a unique look while being so lightweight it feels as if you're wearing nothing at all. Feel Nothing. See Everything.

Rely on premium sunglasses by 100% if you're looking for quality and efficiency.
