

How do I clean the taclite fabric?

Machine wash in cold water, inside out with mild detergent. Tumble dry on low.

What widths are your boots?

Our boots come in regular (D) or wide (EE).

How do I clean my boots?

Suede Cleaning Directions

- To clean, use a rubber eraser to remove dirt and smudges. Then, brush lightly with a soft brush specifically for suede and nubuck products.
- If your shoes are muddy, wait for the mud to dry so you can more easily wipe this off before cleaning suede.
- Care should be taken to brush in the same direction. If you brush in different directions, some suedes will give the appearance of being two different colors.
- Never use a wire brush or polish on suede or nubuck. (Some suede brushes do have wire in the center, which is specifically made for use on suede).
- Follow up with a silicone spray for water and stain resistance.
