

YOUR GUIDE TO THE 5.11® RUSH TIER SYSTEM

Maximize your carrying capacity with the ultimate modular system

The RUSH Tier System is a 4-piece strap set that allows you to transition your kit easily from work, to range, to travel. The system is compatible with all MOLLE-compatible 5.11® backpacks, messenger bags, duffle bags, and many accessory packs.

STEP-BY-STEP ASSEMBLY INSTRUCTIONS

1. Secure the arm or shoulder straps of the secondary bag by detaching them or folding them into pockets.

2. Line up your bags to locate the best anchor points - often the top and bottom side panel MOLLE strips on most backpacks.

3. Attach the middle C-clip of the webbing strap to an upper MOLLE strip on the side panel of your primary bag.

4. Secure the end C-clip of the webbing strap to the same MOLLE strip.

5. Attach a Tier System buckle to an upper left MOLLE strip on the side panel of your secondary bag.

6. Repeat steps 3-5 for the other 3 webbing strap and buckle sets on your primary and secondary bags.

RUSH TIER SYSTEM

Turn your RUSH series bags into MOLLE attachments and max out your carrying capacity. The RUSH Tier straps connects individual bags and packs, perfect for extending your weekend backpacking trip or carrying all your range gear in one kit.

- + Quick connect/disconnect
- + Included with RUSH MOAB10 and MOAB6 bags and the RUSH Tier Rifle Sleeve
- + Great for use as extra compression straps on your bags and packs
