

FAQ

WHAT ARE THE PRODUCTS MADE OF?

Extremely Durable, UV Stabilized Polyethylene

HOW LONG WILL IT TAKE TO ASSEMBLE THE STUMP?

All Stump models come completely assembled minus the interior shelf. The legs for the Stump will need to be assembled.

IS THE WOOD FOR LEGS INCLUDED WITH THE STUMP?

No.

HOW DO I ELEVATE THE STUMP?

The steel plate is specifically designed for elevation of the Stump. It is made to hold 4x4 green treated posts, connect to our Steel Skid System or Steel Tower System, which all elevate your Stump.

HOW HIGH CAN THE STUMP BE ELEVATED?

We recommend not going higher than 10 ft. to the base of the Stump. That would put you 14-16 ft. at eye level.

DO I NEED TO CROSS BRACE THE 4X4 POSTS?

Yes. It is essential that you cross brace for added stability. *The outriggers add stability as well.

DOES SNOW LOAD AFFECT THE ROOF?

No. We live and hunt in the snow country of Minnesota so we made sure in our design that it can take on the snow load.

IS IT LOUD INSIDE WHEN YOU FIRE A GUN?

No, as long as the muzzle of the gun is sticking outside the window. With that being said, it is always recommended to wear ear protection when shooting a gun.

CAN I BOW HUNT FROM THE STUMP?

Yes. The Stump 3 man and the 4 man are designed with the bow hunter in mind. The 1-man is too small for a bow hunter.

WHAT COLORS DOES THE STUMP COME IN?

We currently offer 2 colors for all of our Stump models - Alpine Green or Weathered Wood. The Polyethylene material is a material you can paint for camouflaging The Stump.

CAN I LOCK THE STUMP?

We offer a locking door handle as an option to purchase.

CAN I USE A HEATER IN THE STUMP?

If it is approved for indoor use, then you can use it in The Stump.
