

TM

 **BLOODSPORT**™

When that 10-pointer shows and you draw back... practice ends. You dial in, tense up and do everything in your power to keep it together. Bloodsport exists for this exact moment. With your pulse quickening and hands shaking, we remove all doubt that your arrow will deliver.

Bloodsport's arsenal of hand-selected arrows and precision broadheads are designed to ensure every shot is a lethal shot. Tested to the tightest tolerances and manufactured to the highest levels of accuracy, our archery products give you assurance when it matters most.

# BLOOD RING™

CERTAIN SHOT TECHNOLOGY

THE BLEEDING EDGE

**PROOF IS POWER. AND BLOODSPORT'S BLOOD RING™ IS PROOF YOU CAN SEE IN AN INSTANT. THE PATENTED TECHNOLOGY IDENTIFIES WHICH ORGAN HAS BEEN HIT BASED ON THE BLOOD TYPE AND COLOR ON THE RING. THESE CLUES SERVE AS A MAP TO DIRECT YOUR PURSUIT FOR IMPROVED ODDS AT A SUCCESSFUL RECOVERY.**

U.S. Patents  
9,121,678 • 9,366,513

GE OF ARCHERY

# R.O.C. SYSTEM

BLOODSPORT'S PATENTED RELIABLE OUTSERT COMPONENT (R.O.C.) SYSTEM IS DESIGNED TO PERFECT MICRO-DIAMETER AND SMALL DIAMETER ARROW PERFORMANCE. THE R.O.C. ADDS VALUABLE FRONT-OF-CENTER AND ABSORBS THE SHOCK OF BROADHEAD IMPACT BY TRANSFERRING ENERGY DOWN THE LENGTH OF THE ARROW. THIS ADDS TREMENDOUS STRENGTH AT THE ARROW/BROADHEAD CONNECTION WHERE OTHER ARROWS TYPICALLY FAIL.

U.S. Patent 9,638,499

# NEW JUSTICE™

STRAIGHTNESS: .001"

The Justice™ introduces the small diameter arrow to Bloodsport's ever-growing line of hunting arrows. Its .001-inch straightness produces undeniable field-point performance, while Rugged Wrap™ construction shows no mercy in flight and on impact. Unwavering stability in an R.O.C. System optimized for the .204 diameter adds tremendous strength. Once he's down, Blood Ring™ technology directs your efforts for a successful recovery.

U.S. Patents  
9,121,678 • 9,366,513

# EVIDENCE™

**STRAIGHTNESS: .001"**

Our best penetrating arrow ever. The Evidence™ is manufactured to a precise .001-inch straightness tolerance. Combined with its proprietary Rugged Wrap™ construction, it features thick walls with a micro-diameter shaft to provide unparalleled flight and penetration, even at long distances. This level of accuracy and toughness has yet to be duplicated.

# TIMBERWOLF™

## STRAIGHTNESS: .004"

No other arrow masters advanced construction and a traditional design like the Timberwolf™. A carbon shaft paired with a true cherry wood overlay and classic shield-shaped feather fletching make this arrow ideal for recurve bows or hunters looking for a more authentic option. Go native with the Timberwolf.

# ATHENA™

## STRAIGHTNESS: .006"

Specially designed for lady archers, the Athena™ provides optimal impact at low draw weights. Made of 100% carbon and precisely manufactured to Bloodsport's strict specs, this baby is light, tough and deadly accurate. It's so deadly, we added the pink accents just to keep your man's hands out of the quiver.

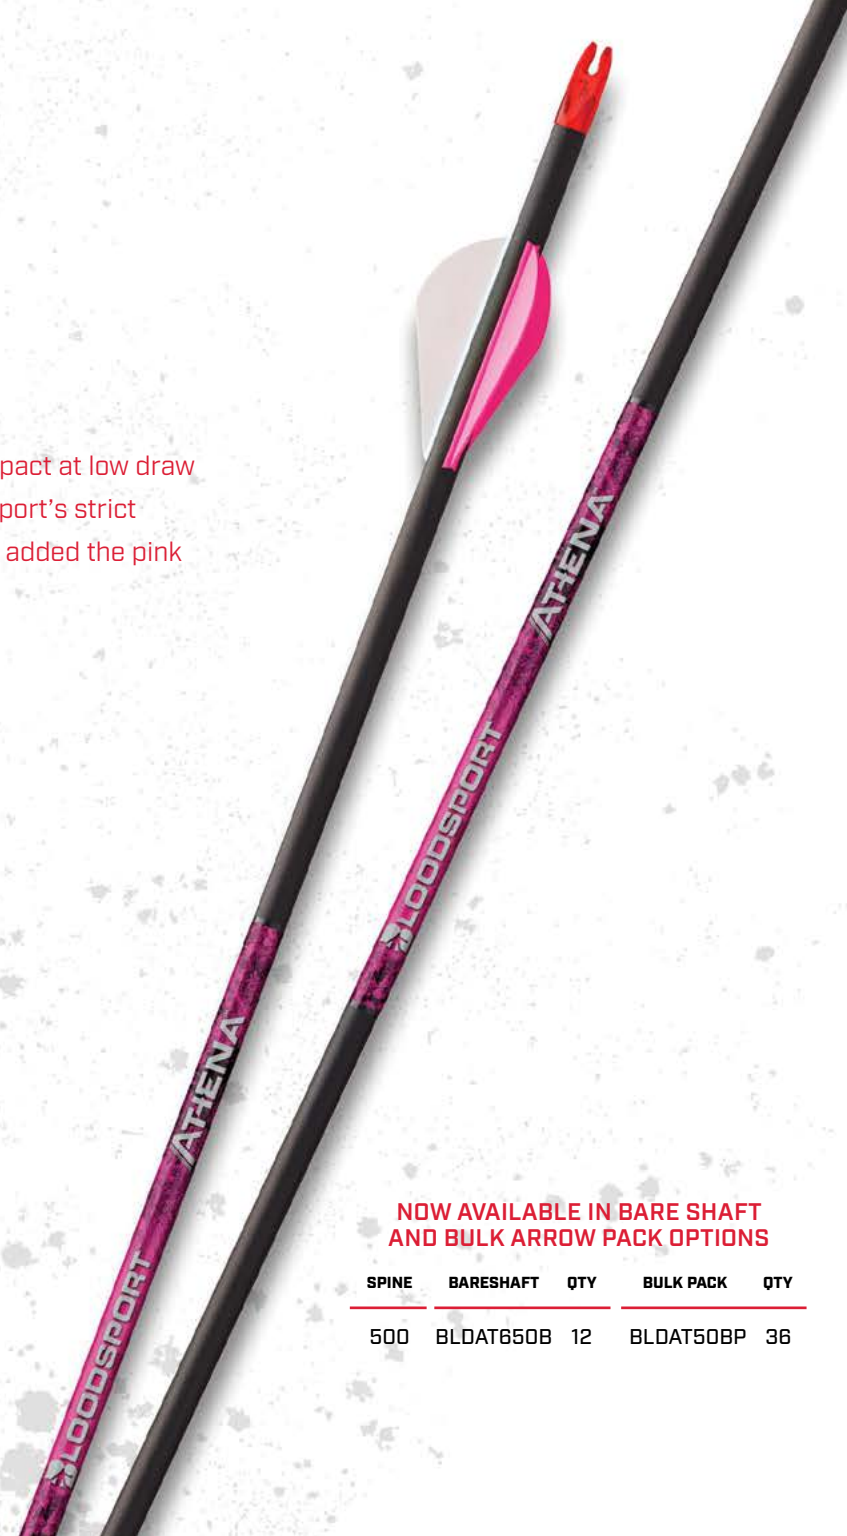

MODEL#	SPINE	INNER DIAMETER	OUTER DIAMETER	GPI	QTY

# WITNESS™

## STRAIGHTNESS: .003"

Witness crossbow perfection. Bloodsport's Witness™ arrows are designed for today's high-speed crossbows and available in two popular lengths. With a front-of-center design, these modern arrows fly at 400+ feet per second with wicked precision and deep penetration.

	MODEL#	SPINE	INNER DIAMETER	OUTER DIAMETER	TOTAL WEIGHT	QTY
<b>20"</b>	B8110053	300	.300"	.344"	325 gr	6

# NEW RECKONING™

BROADHEAD SYSTEM

The final reckoning is here. Bloodsport's new Reckoning™ platform pairs an upgraded universal ferrule with 100% stainless steel fixed blades in four menacing designs.

The 1½-inch Deep Cut sinks deep for maximum penetration, while the Wide Cut harnesses a 1½-inch diameter for deadly wound channels. All blades integrate tight tolerances for an enhanced fit that flies better and stronger.

- Revolutionary Scooptail® design accomplishes in-flight accuracy with a snowplow effect to deliver maximum penetration
- Accepts any Reckoning™ blade style
- Specifically designed to ream arrow passageway for less friction

	MODEL#	GRAIN	PACK
<b>WIDE CUT</b>	BLDWC100	100	3
<b>DEEP CUT</b>	BLDDC100	100	3

U.S. Patent #8,142,310

## WIDE CUT 100<sup>GRAIN</sup> 1½" CUTTING DIAMETER

- 1½" cutting diameter
- Wide cut blades create massive wound channel
- Cut-on-contact tip
- 100% stainless steel construction
- 0.03" thick blades hardened for extra sharpness

## DEEP CUT 100<sup>GRAIN</sup> 1½" CUTTING DIAMETER

- 1½" cutting diameter
- Deep cut blades for maximum penetration
- Cut-on-contact tip
- 100% stainless steel construction
- 0.03" thick blades hardened for extra sharpness

# WRAITH™

## TURKEY BROADHEADS

Available in two blade styles, the Wraith's revolutionary design combines flexibility with in-flight accuracy for terminal performance.

- Revolutionary Scooptail® design accomplishes in-flight accuracy with a snowplow effect to deliver maximum penetration
- Specifically designed to ream arrow passageway for less friction

# TURKEY BODY SHOT

100 GRAIN 1 1/8" CUTTING DIAMETER

- 1 1/8" cutting diameter
- Reverse-angle blades specifically designed for turkey body shots
- Cut-on-contact tip
- 100% stainless steel construction
- 0.03" thick blades hardened for extra sharpness

	MODEL#	GRAIN	PACK
TURKEY BODY SHOT	10784	100	3
TURKEY LOPPER	10785	125	3

U.S. Patent #8,142,310

# TURKEY LOPPER

125 GRAIN 2 3/8" CUTTING DIAMETER

- 2 3/8" cutting diameter
- Oversized reverse-angle blades specifically designed for turkey head shots
- Cut-on-contact tip
- 100% stainless steel construction
- 0.03" thick blades hardened for extra sharpness

# GRAVEDIGGER®

## HYBRID MECHANICAL BROADHEAD

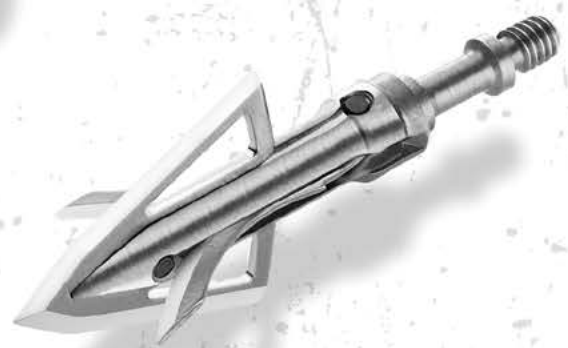

Pick your cut to take down big game with the Gravedigger® hybrid mechanical broadhead. In fixed-blade mode, the Gravedigger features a 1-inch blade with two ½-inch bleeders for precise in-flight performance with hard-hitting impact. Loosen the set screw to take advantage of the no-fail mechanical format. Two cross-opening blades stay closed in flight, but deploy immediately upon entry without critical energy loss for a maximum 1¾-inch cutting surface.

- 1" fixed blade with ½" bleeders
- Bone-splitting cut-on-contact and chisel tip
- 1¾" cross-opening curved mechanical blades
- Fixed blade mode
- 416 stainless steel blades
- 7075 aircraft-grade aluminum ferrule
- Patented Blade Retention System™
- No rubber bands or O-rings
- Guaranteed to cut no matter what

# GRAVEDIGGER® EXTREME

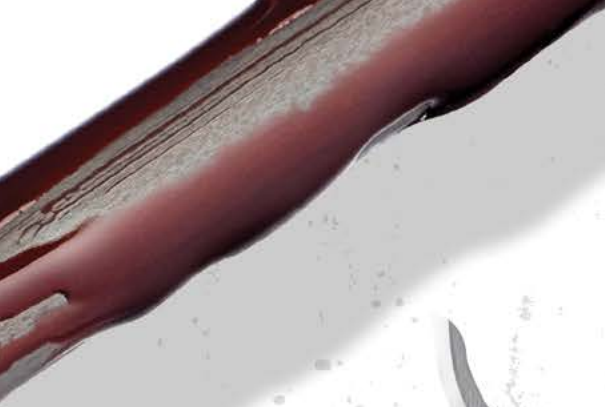

It's the most monumental development in broadhead technology since the original Gravedigger. The Gravedigger® Extreme hybrid mechanical broadhead delivers even more devastating results than its predecessor. Hardened stainless steel blades create a deadly 2¼-inch cutting diameter. Further propelled by a 1¼-inch fixed blade, the Gravedigger Extreme penetrates the hide then deploys inside for maximum blood loss.

- 1¼" cutting diameter main blade
- 2¼" cutting diameter mechanical blades
- Chisel tip and cut-on-contact options
- 420 stainless steel blades
- 7075 aircraft-grade aluminum ferrule
- Patented Blade Retention System™
- No rubber bands or O-rings
- Guaranteed to cut no matter what
- True field-point accuracy

# NIGHT FURY®

Meet the most accurate mechanical broadhead in the business. The Night Fury® uses a patented cross-opening design to reduce the blade surface, allowing it to fly with field-point accuracy. Unlike traditional “over-the-top” mechanical broadheads, the Night Fury doesn’t require rubber bands or O-rings. This decreases the energy required to open the blades and preserves more power for superior impact penetration.

- 1½" cross-opening curved mechanical blades
- 416 hardened steel ferrule
- 420 stainless steel blades
- No rubber bands or O-rings
- Bone-splitting chisel tip
- True field-point accuracy

	MODEL.#	GRAIN	PACK

**100** GRAIN / **125** GRAIN

**1 7/8" CUTTING DIAMETER**

# NIGHT FURY<sup>®</sup> EXTREME

The blade containment system on the Night Fury<sup>®</sup> Extreme flies with deadly field-point accuracy. What you may not expect is the punishing damage this blade delivers upon impact. Two curved, cross-opening blades instantly open on contact to create a cutting diameter of 2¼ inches. And because the Night Fury Extreme doesn't require any rubber bands or O-rings, there is little energy loss – making hits all the more devastating.

- 2¼" cutting diameter mechanical blades
- Integrated chisel tip
- 420 stainless steel blades
- 7075 aircraft-grade aluminum ferrule
- Patented Blade Retention System™
- No rubber bands or O-rings
- True field-point accuracy

	MODEL#	GRAIN	PACK

# HIGH VOLTAGE™

The three blades on the High Voltage™ open on impact to create an expansive 2-inch cutting diameter for maximum penetration. But while in flight, these blades remain tucked in without the need for rubber bands or O-rings – ensuring precise field-point accuracy.

- Integrated chisel tip
- 2" cutting diameter mechanical blades
- Patented Blade Retention System™
- No rubber bands or O-rings
- 416 hardened steel ferrule
- 420 stainless steel blades
- True field-point accuracy

# NITEFALL™

REAR-DEPLOYING BROADHEAD

A large triangular blade flanked by two razor-sharp mechanicals folds into a hardened chisel tip ferrule for in-flight precision. The mechanical blades immediately open on impact to create a menacing cutting force that spans 2 inches in diameter. The innovative construction of the Nitefall™ allows the expanding blades to leave large entry holes for short blood trails.

- Patent-pending lock holds blades in open or closed position
- 1" fixed blade
- 2" cutting diameter mechanical blades
- No rubber bands or O-rings
- 7075 aircraft-grade aluminum ferrule
- 420 stainless steel blade
- Guaranteed to cut no matter what
- True field-point accuracy

U.S. Patent #8,684,869

# R.O.C. SYSTEM

The R.O.C. (Reliable Outsert Component) System was designed to strengthen micro-diameter and small diameter arrows for better penetration and performance upon impact. Extensive testing found these arrows excel in flight, but poorly engineered outserts add stress to arrow walls and tips, ultimately causing failures. The R.O.C. System addresses these issues with a patented shock-absorbing and energy-transferring design that maintains accuracy and maximizes impact.

## R.O.C. OUTSERTS 6-PACK (60 GR)

# READY OF HUNT COMBO PACK

NEW

The Ready to Hunt Combo Pack comes field-ready with everything you need for your next archery hunt: arrows, broadheads and field points built to the tightest tolerances for a custom, perfect fit.

The Hunter arrows utilize 100% carbon and Rugged Wrap™ construction to stay straight in flight and hit targets with brutal force. The Night Fury® broadheads feature two cross-opening mechanical blades that don't require O-rings, allowing the blades to maintain peak energy for deep penetration with a 1 $\frac{1}{8}$ -inch cutting diameter.

#### INCLUDES:

- Three 350-Spine Hunter Arrows
  - Three Night Fury® (100 gr.) Broadheads
  - Three Field Points
- 
- Field-ready with arrows and broadheads included
  - Arrows cut to OSFM length of 29 $\frac{1}{2}$  inches
  - 100% carbon arrow shafts with Rugged Wrap™ construction
  - Patented cross-opening broadhead design for increased field-point accuracy
  - No rubber bands or O-rings required
  - 1 $\frac{1}{8}$ -inch cutting diameter
  - Glued inserts

**BLOODSPORT™**  
*THE BLEEDING EDGE OF ARCHERY*

▶ When that 10-pointer shows and you draw back... practice ends. You dial in, tense up and do everything in your power to keep it together. Bloodsport exists for this exact moment. With your pulse quickening and hands shaking, we remove all doubt that your arrow will deliver.

Bloodsport's arsenal of hand-selected arrows and precision broadheads are designed to ensure every shot is a lethal shot. Tested to the tightest tolerances and manufactured to the highest levels of accuracy, our archery products give you assurance when it matters most.

R.O.C. SYSTEM

Bloodsport's patented Reliable Outsert Component (R.O.C.) System is designed to perfect micro-diameter and small-diameter arrow performance. The R.O.C. adds valuable front-of-center and absorbs the shock of broadhead impact by transferring energy down the length of the arrow. This adds tremendous strength at the arrow/broadhead connection where other arrows typically fail.

BLOOD RING

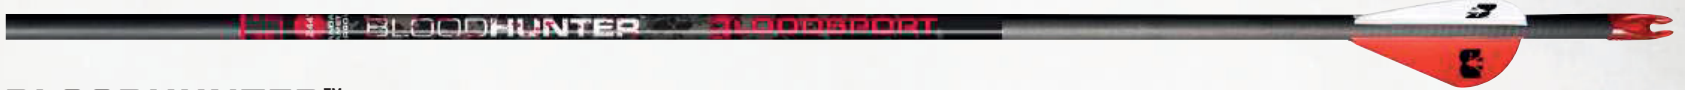

Proof is Power. And Bloodsport's Blood Ring™ is proof you can see in an instant. The patented technology identifies which organ has been hit based on the blood type and color on the ring. These clues serve as a map to direct your pursuit for improved odds at a successful recovery.

## BLOODHUNTER™

Standard-diameter arrows

The Bloodhunter™ is a standard diameter, mid-weight arrow with a .004" straightness that delivers the precision today's bowhunters demand. Its high kinetic energy penetrates deep to take down any game. After the shot, survey the Blood Ring™ to identify the location of your hit and plan a successful retrieval. Rugged Wrap™ construction makes sure the Bloodhunter will stay with you hit after hit; so wipe off the blood and find your next target.

## JUSTICE™

Small-diameter arrows

The Justice™ introduces the small diameter arrow to Bloodsport's ever-growing line of hunting arrows. Its .001-inch straightness produces undeniable field-point performance, while Rugged Wrap™ construction shows no mercy in flight and on impact. Unwavering stability in an R.O.C. System optimized for the .204 diameter adds tremendous strength. Once he's down, Blood Ring™ technology directs your efforts for a successful recovery.

## GRAVEDIGGER®

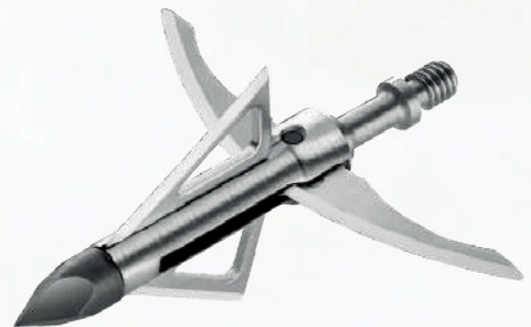

Pick your cut to take down big game with the Gravedigger® hybrid mechanical broadhead. In fixed-blade mode, the Gravedigger features a one-inch blade with two ½-inch bleeders for precise in-flight performance with hard-hitting impact. Loosen the set screw to take advantage of the no-fail mechanical format. Two cross-opening blades stay closed in flight, but deploy immediately upon entry without critical energy loss for a maximum 1¼-inch cutting surface.

- + 1" fixed blade
- + Bone-splitting cut-on-contact and chisel tip
- + 1¼" cross-opening curved mechanical blades
- + Fixed blade mode
- + 416 stainless steel blades
- + 7075 aircraft-grade aluminum ferrule
- + Patented Blade Retention System™
- + No rubber bands or O-rings
- + Guaranteed to cut no matter what

## GRAVEDIGGER® EXTREME

It's the most monumental development in broadhead technology since the original Gravedigger. The Gravedigger® Extreme hybrid mechanical broadhead delivers even more devastating results than its predecessor. Hardened stainless steel blades create a deadly 2¼-inch cutting diameter. Further propelled by a 1¼-inch fixed blade, the Gravedigger Extreme penetrates the hide then deploys inside for maximum blood loss.

- + 1¼" cutting diameter main blade
- + 2¼" cutting diameter mechanical blades
- + Chisel tip and cut-on-contact options
- + 420 stainless steel blades
- + 7075 aircraft-grade aluminum ferrule
- + Patented Blade Retention System™
- + No rubber bands or O-rings
- + Guaranteed to cut no matter what
- + True field-point accuracy

## BROADHEADS

**BLOODSPORT™**  
THE BLEEDING EDGE OF ARCHERY

### NIGHT FURY®

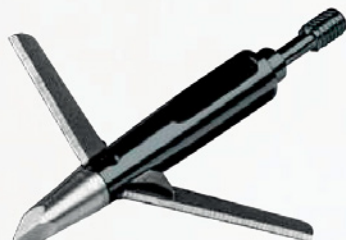

Meet the most accurate mechanical broadhead in the business. The Night Fury® uses a patented cross-opening design to reduce the blade surface, allowing it to fly with field-point accuracy. Unlike traditional “over-the-top” mechanical broadheads, the Night Fury doesn’t require rubber bands or O-rings. This decreases the energy required to open the blades and preserves more power for superior impact penetration.

- + 1 $\frac{1}{8}$ ” cross-opening curved mechanical blades
- + 416 hardened steel ferrule
- + 420 stainless steel blades
- + No rubber bands or O-rings
- + Bone-splitting chisel tip
- + True field-point accuracy

#### 3-PACK [CHISEL TIP]

GRAIN	MODEL #
100	10779
125	10780

\*U.S. Patent 8,684,869

### DEADLINE™

Bloodsport designed the Deadline™ specifically for today’s high-performance crossbows. The mechanical broadhead easily handles crossbows’ top speeds, while still maintaining the lowest amount of drag for supreme down-range accuracy. On impact, the blades open with minimal energy loss to carve two-inch thick entrance holes for a swift, clean kill.

- + Designed specifically for crossbows
- + 38% less drag than competitors
- + Fully deploys on impact
- + 2” entrance holes
- + Tested to 500 fps
- + No rubber bands or O-rings
- + 0.040” blade thickness
- + Won’t open in flight
- + Prevents blade shearing

#### 3-PACK [CHISEL TIP]

GRAIN	MODEL #
100	BLDBH1002

\*U.S. Patent 8,684,869

### NIGHT FURY® EXTREME

The blade containment system on the Night Fury® Extreme flies with deadly field-point accuracy. What you may not expect is the punishing damage this blade delivers upon impact. Two curved, cross-opening blades instantly open on contact to create a cutting diameter of 2 $\frac{1}{4}$  inches. And because the Night Fury Extreme doesn’t require any rubber bands or O-rings, there is little energy loss – making hits all the more devastating.

- + 2 $\frac{1}{4}$ ” cutting diameter mechanical blades
- + Integrated chisel tip
- + 420 stainless steel blades
- + 7075 aircraft-grade aluminum ferrule
- + Patented Blade Retention System™
- + No rubber bands or O-rings
- + True field-point accuracy

#### 3-PACK [CHISEL TIP]

GRAIN	MODEL #
100	10818

\*U.S. Patent 8,684,869

### NITEFALL™

A large triangular blade flanked by two razor-sharp mechanicals folds into a hardened chisel tip ferrule for in-flight precision. The mechanical blades immediately open on impact to create a menacing cutting force that spans two inches in diameter. The innovative construction of the Nitefall™ allows the expanding blades to leave large entry holes for short blood trails.

- + Patent-pending lock holds blades in open or closed position
- + 1” fixed blade
- + 2” cutting diameter mechanical blades
- + No rubber bands or O-rings
- + 7075 aircraft-grade aluminum ferrule
- + 420 stainless steel blade
- + Guaranteed to cut no matter what
- + True field-point accuracy

## COMPONENTS

### R.O.C. SYSTEM

The R.O.C. (Reliable Outsert Component) System was designed to strengthen micro-diameter and small diameter arrows for better penetration and performance upon impact. Extensive testing found these arrows excel in flight, but poorly engineered outserts add stress to arrow walls and tips, ultimately causing failures. The R.O.C. System addresses these issues with a patented shock-absorbing and energy-transferring design that maintains accuracy and maximizes impact.

#### 6-PACK [60 GR R.O.C. 165 OUTSERTS]

SPINE	OUTER DIA.	COLOR	MODEL #
300	.165 in.	RED	1149
350	.165 in.	BLACK	1147
400	.165 in.	GREEN	1148
500	.165 in.	BRONZE	1144

#### 6-PACK [32 GR R.O.C. 204 OUTSERTS]

SPINE	OUTER DIA.	COLOR	MODEL #
300	.204 in.	RED	BLDS1150
350	.204 in.	BLACK	BLDS1151
400	.204 in.	GREEN	BLDS1152
500	.204 in.	BRONZE	BLDS1153

\*U.S. Patent 9,638,499

### BRASS INSERTS

Precision-machined inserts weighing 50, 75 and 100 grains allow you to fine-tune your arrow's front-of-center balance for better flight dynamics and more consistent groupings. These inserts are guaranteed to enhance your down-range performance.

#### SINGLE-PACK [STANDARD DIAMETER INSERTS]

GRAIN	INNER DIA.	MODEL #
50	.244 in.	10797
75	.244 in.	10798
100	.244 in.	10799
