

# TECHNOLOGIES

## SUNGLASSES GARAGE

The One helmet has a specific compartment designed to hold a pair of sunglasses. (Available on The One & Trackdown models).

## ADJUSTABLE VISOR

With 3 positions, the adjustable visor adapts to all ride conditions, and means your goggles can sit on your forehead.

## CLICK-TO-FIT™ SYSTEM

The Click-to-Fit system allows precise adjustment. On the road, you will be able to adjust helmet pressure to your head for perfect stability. (Available on all models).

## VENT CAPS

Plug them in and stay dry! The vent caps efficiently block off wind and rain for the wettest outings.

## AVID PROGRESSIVE EPS

Creating helmets that perform in all types of impacts requires getting the details exactly right. Using high density EPS ensures high energy impacts are effectively absorbed. Low density EPS, however, provides superior performance in less severe impacts. Bollé helmets with the AViD liner technology use a combination of different EPS densities and/or optimization of the ventilation channels to virtually decrease the density in the top area. The result is a lighter, more ventilated helmet with progressive shock absorption that will absorb a wider range of impacts. (Available on the Trackdown model.)
