

EMERGENCY DRINKING WATER

DX100EW Case of 96 Sachets

DX100EW

TYPE

U.S.C.G. SOLAS Emergency Drinking Water

USES

Datrex emergency drinking water, the gold standard of emergency drinking water, are individual servings of purified water, bagged in a specially designed polymer-foil pouches. This product is designed for use on LAND AND SEA in both emergency and non-emergency situations where normal supplies of water are unavailable. Areas of use: Survival at sea, land based disasters, outdoor activities (hunting, fishing, hiking, backpacking, etc.) The DX100EW is packed into 8 strong clear plastic bags containing 1.5 liters each. This packaging method makes it easy to pack into lifeboats and life rafts and give extra protection in general.

FEATURES

Produced and packaged using the most modern purification processes and packaging materials for optimum Bursting strength and Shelf Life (5 years from the date of manufacture). Lightweight, extremely compact and easy to dispense single serve pouches. Conveniently packaged in 1.5 liter overwrapped bags for easy proportioning for Liferaft/Lifeboat applications. Loss potential minimized due to individual pouches.
