

2019 PRODUCT CATALOG

REAL SCIENCE. REAL RESULTS.

Scent prevention is a process and a routine. Hunters plan and strategize each and every season on how to go undetected for that opportunity of a lifetime. The goal is to reduce your odor signatures to the lowest possible level.

Dead Down Wind™ does not offer cover scent but uses enzymes – a natural catalyst for change. They break down odors at a molecular level, a process we call Enzyme ScentPrevent®. The use of enzymes allows Dead Down Wind™ products to eliminate a wider range of odors.

Our three-phase system features Laundry, Hygiene and Field products which actively work together to destroy bacteria, annihilating odor right at the source.
