Boomer Fulcrum Sled:

Fulcrum: (Webster's definition)

- a. the support about which a LEVER turns.
- b. one that supplies capability for action.

Quite simply put, this is the perfect definition for the perfect sled.

- Realistic fulcrum pivoting action conditions your players to achieve leveraged power over an opponent without losing their balance
- The only sled that is completely adjustable
- Adjust spring tension, pad height and angle

Expandable:

Individual components allow stations to be added as the need arises. Basic sleds can start with 2 man capability and expanded as you desire. A 5 man sled can be easily broken down to a 2 and a 3 man sled.

Blocking units:

Each individual blocking unit is made up of "pigs" and pads. The "pig" is constructed with a high strength 1/4" steel plate, double welded for maximum strength and durability. The "pig" attaches to the steel chassis and is fully adjustable. Our exclusive spring tension adjustment is an integral part of each "pig". The pad fits onto the "pig" and is fully adjustable.

Construction:

Main frame:

6" x 1/2" face plates mounted on sturdy 1/4" steel plates. Square tubing runners and skids have end caps and 100% welded flanges.

Live action springs:

Flat leaf springs deflect to absorb the shock and bounce back to provide realism in drills.

PRACTICE PLATFORM MOUNDS

Effective Velocity, by definition, is the study of pitch speed and how location changes the reaction time by forcing the hitter to hit the ball at a contact point that is different than they were ready for. When a pitcher throws the ball "inside" or "outside", the speed of the pitch changes because the hitter needs to adjust to the location. A pitch can change up to 3 MPH for every 6" inches that the ball changes laterally. The **360° Pitching Target** helps a pitcher with location, thus fine-tuning his Effective Velocity.

Features:

- 40 oz. black vinyl
- Steel frame construction
- Ships via Ground
- Easy to assemble

Let **FISHER ATHLETIC** pad your stadium

Shipyard Park is Charleston, South Carolina's premier baseball complex and sports venue located along the majestic banks of the Wando River in Mt. Pleasant, SC. Using a combination of pads, all "Impact" surfaces were padded on the five playing fields and the indoor training facility. From the "L" shaped PSMS pads on the backstops, to 3-sided and flat pads for the fence rails and vertical posts, we enhanced player safety as well as improving the look and feel of an extraordinary venue. Let us do the same for your facility.
