

UNIQUE FEATURES FROM HATSAN

QuietEnergy Sound moderator in fully shrouded barrel for reduced down-range noise—Approximately 50% Quieter.

QUATTRO Trigger

This advanced two-stage match trigger is only available from Hatsan. It offers three-point adjustment to control the trigger load, the position of the first and second stages of the firing cycle, and the length of trigger travel—all while maintaining full sear engagement. The custom trigger also allows you to release finger pressure if the shot cannot be taken after engaging in the first stage of the firing cycle, automatically returning the trigger to full engagement. And a drop safety interlock device has been incorporated to eliminate the possibility of the airgun accidentally firing if it's dropped (whether or not the safety is on).

SAS™

The proprietary Shock Absorber System reduces vibration and increases the life of the gun, optics, and accessories.

TRUGLO Fiber Optics

Fiber-optic technology has been integrated into a microadjustable rear sight and front sight to lend more accuracy to your shot.

XRS - Recoil Reduction System

Hatsan air pistols are equipped with Hatsan's "XRS-Recoil Reduction System" for a noticeably smooth shot. Recoil is absorbed during the shot by the design of the sliding action. This makes for a more accurate and comfortable shooting experience.

Barrel Release System

Barrel Release provides easier breaking of the barrel with less cocking effort, while also serving as an additional safety feature. The breach locking tab is easily released by simply pushing forward the barrel release button.

TRIOPAD® Butt System

Maximum recoil absorption provides added comfort, and three stock spacers allow adjustments for appropriate length of pull.

WHAT SETS HATSAN AIRGUNS APART FROM THE COMPETITION?

More Power

Even though velocity rates may appear the same from brand to brand, in most instances that is not the case. Hatsan establishes its velocity rating using **heavier** lead pellets, while most competitors use lighter aluminum pellets to market their velocities. What this means for you is that a Hatsan airgun delivers **OVER 30% MORE IMPACT ENERGY** than an alloy-tested airgun with the same velocity.

Unique Features

Many of our airguns offer specialty features that come standard within our product line to provide shooters with a better experience, including the Quattro Trigger, SAS-Shock Absorber System, QuietEnergy, XRS – Recoil Reduction System, Barrel Release System, TruGlo® fiber optics, and the Triopad® butt system.

Custom Designs

While other manufacturers work from widely used templates, all Hatsan designs are conceived and developed in-house. This means your Hatsan airgun is an original, not a reproduction.

Serious. Solid. Impact.

100% Vertically Integrated

Complete vertical integration ensures the high quality you expect from Hatsan. Every part of every airgun is produced right in our facilities to guarantee a wellmade finished product. And only the highest-grade raw materials are used, including fine Turkish walnut and durable German steel.

Family Ownership

It all started in 1976 with one young man hoping to replicate an air dart gun in his parents' garage. Since that time, Hatsan has become one of the world's most recognized brands in the shooting sports, airgun and firearm industry – delivering its products to more than 95 countries. This family owned and operated manufacturer maintains a hands - on approach - producing all designs and components in - house to ensure that each product deserves to bear the Hatsan name. In fact, the original founder is still very involved in new product development and design.
