

# WINDPROOF

0: Air permeable

1-3: Windproof level is not relevant

4: Slightly windproof - 13-30 CFM Breathable and wind resistance for hiking use

5: Highly windproof - 2-12 CFM Strong wind resistance for mountaineering

6: Windproof - the fabric is fully windproof

# WATERPROOFNESS

1: Quick dry - The material doesn't have any membrane or DWR treatment

2: Water repellent (DWR Treated) - The material doesn't have any membrane so it doesn't have any waterproofness but it is treated with DWR for water repellency

3: Waterproof fabrics - Hybrid apparel made with waterproof fabrics but seams are not taped

4: Medium waterproofness - Waterproofness range is the Helly Tech Protection range 5000 to < 10000 mmH2O

5: High waterproofness - Waterproofness range is Helly Tech Performance range 10000 to < 20000 mmH2O

6: Extreme waterproofness - Waterproofness range is the Helly Tech Professional range +20000 mmH2O
