
WINDPROOF

0: Air permeable

1-3: Windproof level is not relevant

4: Slightly windproof - 13-30 CFM Breathable and wind resistance for hiking use

5: Highly windproof - 2-12 CFM Strong wind resistance for mountaineering

6: Windproof - the fabric is fully windproof

WATERPROOFNESS

1: Quick dry - The material doesn't have any membrane or DWR treatment

2: Water repellent (DWR Treated) - The material doesn't have any membrane so it doesn't have any waterproofness but it is treated with DWR for water repellency

3: Waterproof fabrics - Hybrid apparel made with waterproof fabrics but seams are not taped

4: Medium waterproofness - Waterproofness range is the Helly Tech Protection range 5000 to < 10000 mmH₂O

5: High waterproofness - Waterproofness range is Helly Tech Performance range 10000 to < 20000 mmH₂O

6: Extreme waterproofness - Waterproofness range is the Helly Tech Professional range +20000 mmH₂O

BREATHABILITY

1-3: Breathability level is not relevant

4: Breathable - Breathability range is the Helly Tech Protection range. 5000 to < 10000 g/sq.m/day

5: Highly Breathable - Breathability range is the Helly Tech Performance range. 10000 to < 20000 g/sq.m/day

6: Extremely Breathable - Breathability range is the Helly Tech Professional range . + 20000 g/sq.m/day

WEIGHT

- 1-3: Lightweight level is not relevant
- 4: Lightweight
- 5: Very lightweight
- 6: Extremely lightweight

DURABILITY

- 1-3: Durability level is not relevant
- 4: Durable - The material has a good durability to physical wear and wash
- 5: Highly durable - Highly durable to physical wear and wash
- 6: Heavy-duty durability - Heavy duty with very good durability to physical wear and wash
