# SAFETY DATA SHEET

<b>Prevention</b>	<i>Do not handle until all safety precautions have been read and understood. Keep away from heat/sparks/open flames/hot surfaces. No smoking. Keep container tightly closed. Ground/bon container and receiving equipment. Use explosive proof equipment and non-sparking tools. Take precautionary measures against static discharge. Do not breath fumes. Wash hands thoroughly after handling. Avoid release to the environment.</i>
<b>Response</b>	<i>IF SWALLOWED: Immediately call a poison center or physician. Rinse mouth. Do NOT induce vomiting. IF ON SKIN: Remove contaminated clothing. Rinse skin with water/shower. IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing. Seek medical attention immediately.</i>
<b>Storage</b>	<i>Store in a well-ventilated place. Keep cool. Store locked up.</i>
<b>Disposal</b>	<i>Dispose of container and contents in an environmentally safe manner.</i>

## SECTION 4 - FIRST-AID MEASURES

### Description of First-Aid Measures

<b>Eye Contact</b>	<i>Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing. Seek medical attention immediately.</i>
<b>Skin Contact</b>	<i>Remove with soap and water, rinsing and repeating for 15 minutes. Remove contaminated clothing.</i>
<b>Ingestion</b>	<i>Immediately call a poison center or physician. Rinse mouth. Do NOT induce vomiting.</i>
<b>Inhalation</b>	<i>Remove victim to fresh air and keep at rest in a position comfortable for breathing.</i>
<b>First-Aid Responder Protection</b>	<i>Wear adequate personal protective equipment based on the nature and severity of the emergency.</i>

### Most Important Symptoms and Effects, Both Acute and Delayed

<b>Eye Contact</b>	<i>Liquid contact may damage the eyes, causing pain along with severe eye irritation.</i>
<b>Skin Contact</b>	<i>Causes skin irritation and burns. Repeated exposure may cause skin dryness or cracking.</i>
<b>Ingestion</b>	<i>May be fatal if swallowed and enters airways.</i>
<b>Inhalation</b>	<i>May cause allergy or asthma symptoms or breathing difficulties if inhaled. May cause respiratory irritation.</i>

### Indication of Immediate Medical Attention and Special Treatment

<b>Notes to Physician</b>	<i>Treat symptomatically.</i>
<b>Specific Treatments/Antidotes</b>	<i>Details on specific treatments and/or antidotes are not available.</i>
<b>Immediate Medical Attention</b>	<i>No information available.</i>

## SECTION 5 - FIRE FIGHTING MEASURES

### Suitable Extinguishing Media

<b>Extinguishing Media</b>	<i>Water, CO2, dry chemical, or universal aqueous film forming foam</i>
<b>Unsuitable Media</b>	<i>Water jet</i>

### Specific Hazards Arising from the Chemical or Mixture

<b>Decomposition Products</b>	<i>Decomposition products may include oxides of carbon, nitrogen and/or sulfur as well as smoke, and/or vapors.</i>
<b>Hazards from the Product</b>	<i>Contents extremely flammable. In a fire or if heated, a pressure increase will occur which may result in the container bursting. Vapors heavier than air may spread along the ground and travel to an ignition source.</i>
<b>Mechanical Impact Sensitivity</b>	<i>Probably not sensitive as material is stable.</i>
<b>Static Discharge Sensitivity</b>	<i>Vapors within the flammable limits may be ignited by a static discharge of sufficient energy.</i>

# SAFETY DATA SHEET

## Special Protection Actions for Fire-Fighters

**Protective Actions** Use water spray to cool fire exposed containers, as contents may rupture from heat developed pressure.

**Protective Equipment** Firemen should wear self-contained breathing apparatus with full face-piece operated in positive pressure mode.

## SECTION 6 - ACCIDENTAL RELEASE MEASURES

### Personal Precautions, Protective Equipment and Emergency Procedures

**For Non-Emergency Personnel** No action shall be taken involving any personnel without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spill. Remove ignition sources and provide adequate ventilation only if it is safe to do so.

**For Emergency Responders** Use personal protection as recommended in Section 8. Observe precautions provided for non-emergency personnel above.

### Environmental Precautions

**Precautions** Keep out of drains, sewers, ditches, and waterways. Minimize use of water to prevent environmental contamination.

### Methods and Materials for Containment and Cleaning up

**Containment Procedures** Released content may be contained with oil/solvent absorbent pads, booms, and/or absorbents.

**Cleanup Procedures** Avoid breathing vapors and ventilate the area well. Remove sources of ignition and use non-sparking equipment. Soak up material with inert absorbent and place in safety containers for proper disposal.

**Other Information** The North American Emergency Response Guidebook, the Australian Dangerous Goods-Initial Emergency Response Guide (SAA/SNZ HB 76), or similar resources providing emergency response information for dealing with accidents, spills, leaks, and/or fires involving dangerous goods.

**Prohibited Materials** Combustible absorbent material such as sawdust, use of equipment that may cause sparking.

## SECTION 7 - HANDLING AND STORAGE

### Precautions for Safe Handling

**General Handling Precautions** KEEP OUT OF THE REACH OF CHILDREN.

**Hygiene Recommendations** Do not eat, drink or smoke when using this product. Wash hands thoroughly after use. Remove contaminated clothing and protective equipment before entering eating or smoking areas.

### Conditions for Safe Storage Including And Incompatibilities

**Storage Requirements** In the United States, storage of flammable materials should conform to NFPA 30 Flammable and Combustible Liquid. Outside the United States conformance to local and/or federal codes should be observed. Keep containers tightly closed and stored in a well-ventilated place. Keep away from sources of ignition.

Empty containers retain residue (liquid and/or vapor) and can be dangerous. Do not pressurize, cut, weld, braze, solder, drill, grind, or expose such containers to heat, flame, sparks, static electricity, or other sources of ignition; they may explode and cause injury or death. Do not attempt to clean since residue is difficult to remove. Empty drums should be completely drained, properly bunged, and promptly returned to a drum reconditioner. All other containers should be disposed of in an environmentally safe manner and in accordance with governmental regulations.

**Incompatibilities** Segregate storage away from materials indicated in Section 10.

### Appropriate Engineering Controls

**Engineering Measures** Use only with adequate ventilation. General ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. Local exhaust ventilation or an enclosed handling system may be necessary to control air contamination below that of the lowest OEL from the table above.

# SAFETY DATA SHEET

## Individual Protection Measures

<b>Hygiene Considerations</b>	<i>Avoid breathing vapors and contact with the skin and eyes. Always replace overcap when not in use. Keep out the reach of children. Wash hands after use.</i>
<b>Thermal Hazards</b>	<i>This product does not present a thermal hazard.</i>
<b>Respiratory Protection</b>	<i>An approved respirator with an organic vapor cartridge may be permissible under certain circumstances where airborne concentrations are expected to exceed occupational exposure limits. If respirators are needed, in the United States compliance with OSHA standard 29 CFR 1910.134 is necessary.</i>
<b>Skin Protection</b>	<i>For brief contact, no precautions other than clean body-covering clothing should be needed. When prolonged or repeated contact could occur, use protective clothing impervious to the ingredients listed in Section 2.</i>
<b>Eye/Face Protection</b>	<i>Safety glasses with side shields are recommended as a minimum for any type of industrial chemical handling. Where eye contact with this material could occur, chemical splash proof goggles are recommended.</i>
<b>Other Protective Equipment</b>	<i>Safety showers and eye-wash stations should be available in the workplace near where the material will be used.</i>

## SECTION 13 - DISPOSAL CONSIDERATIONS

<b>Waste Disposal</b>	<i>Product is suitable for burning in an enclosed, controlled burner for fuel value. Hazard characteristics and regulatory waste stream classification can change with product use and location. It is the responsibility of the user to determine the proper storage, transportation, treatment, and/or disposal methodologies for spent materials and residues at the time of disposition. All waste material must be disposed of in compliance with the respective national, federal, state, and/or local regulations.</i>
<b>Waste Disposal of Packaging</b>	<i>Consult with your local landfill to determine if empty small containers can be disposed of with regular trash. For disposal of large containers (typically 10 gallon or larger), or for containers not suitable for landfill, a licensed reconditioner should be used.</i>
<b>Landfill Precautions</b>	<i>Not Available</i>
<b>Incineration Precautions</b>	<i>Not Available</i>
