

TECH DETAILS

EASY ON FIT

Binding opens wide easing entry to begin your session.

SUPPORT LEVEL - MID

Material selection engineering to offer a softer more flexible feel.

ADJUSTABLE SIZING

Adjustable toe design & floating tongue offer different shoe sizes a secure fit. Share your Bindings and #PassTheHandle.

LOW PRO PLATE SYSTEM

The Low Pro Plate system takes much of what we learned from the System binding and incorporates it into a more traditional design. We began by reducing the overall volume by nearly 16%, which translates into a much lighter boot. Our drop-through footbed keeps a rider closer to the deck for maximum control and response. To ensure the baseless design did not produce unwanted plate twist we connected the sidewalls to the chassis, creating a stronger foundation.

RANGE OF MOTION - MAX

Designed for those seeking a softer more flexible boot - tweaking to the Max.

ALUMINUM MOUNTING SYSTEM

Reinforced stability plates with a raised teeth interlocking design reducing heel lift solidifying your connection.

UNIVERSAL 6" MOUNTING SPREAD

Industry standard insert pattern - Mates with every wakeboard on the market today.

MOLDED EVA FOOTBED

Ergonomically molded EVA provides comfort and support for ability levels, impact protection and arch support included on all Hyperlite footbeds.

LACE CLOSURE - SINGLE

Single quick-cinch lace system offers easy on easy off binding entry.

When it comes to quality water sports equipment & accessories, Hyperlite is the brand you can depend on.
