

## TECH DETAILS

### LAYERED GLASS

Our fiberglass is available in 3 weights depending on the board. Over time, traditional woven glass fibers will separate. With layered glass every Hyperlite deck will have the same pop off the double up year after year.

### TAIL SHAPE - DIAMOND

The corners of the diamond tail deliver more pivotal and sharp turning characteristics.

### BIOLITE 3 CORE

The secret recipe we have been perfecting since day one. This core material is the gold standard in the industry and used throughout our line. Bio 3 is our lightest and most durable formula to date.

### MACHINED EVA TRACTION - DIAMOND

Ultra grade EVA foam machined into diamond shapes with a rough finish increases grip and hold.

### BUTCH CUSTOMS

Scott Bouchard has been shaping wakeboards for close to twenty years, working with the biggest legends in the sport. Based in Satellite Beach, Florida Scott's influence on wakeboard and wakesurf shapes can be seen throughout Hyperlite line up.

### TAIL PROFILE - WIDE

The wider the tail shape the more push you have down the wave with increased ollie power.

### DUAL CONCAVE BASE

Channeling water into two streams through the fins and out the tail allowing for a fast and loose feel.

### SHAPED BY SCOTT "BUTCH" BOUCHARD

Scott Bouchard entered the shaping scene as an innovator with a background rooted in surf. His unique take on the 3-Stage Rocker helped riders like Byerly and JD get more pop off the wake when wakes were small. His passion for sourcing new materials and creating new construction methods has produced some of Hyperlite's bestselling models.
