

TECHNOLOGY

CERTIFIED HEARING PROTECTION

ISOTUNES® ARE TESTED TO SAFETY INDUSTRY STANDARDS AND PROVEN TO BE THE BEST AT BLOCKING OUTSIDE NOISE

ISOtunes® products are tested and approved in accordance with ANSI S3.19-1974 specifications. As such, they meet OSHA and NIOSH requirements to be used as hearing protectors in the workplace.

ISOtunes® are Bluetooth earbuds *proven* to block outside noise, allowing you to appreciate your music in peace and quiet, no matter how loud your environment is.

When used as directed, ISOtunes® offers a Noise Reduction Rating (NRR) of 26 dB, ISOtunes® PRO offers an NRR of 27 dB, and ISOtunes® Wired offers an NRR of 29 dB.

SAFEMAX™

HEARING CONSERVATION TECHNOLOGY

ISOTUNES® IS COMMITTED TO PROTECTING AND CONSERVING YOUR HEARING

More than 25 million Americans suffer from Noise Induced Hearing Loss (NIHL), many of whom have been exposed to excessive noise at work or during leisure activities. We do NOT want to add to that number, so we've taken steps to make sure we won't.

ISOtunes® signature SafeMax™ Technology ensures that our products won't damage your hearing, even when used at maximum volume for the full battery life duration. That is why all of our earplug headphones limit the volume output to 85 decibels, making them in line with OSHA and NIOSH standards.

ISOtunes® is committed to personal safety. With our earplug products, we do our part to not only protect your ears from loud outside noises, but allow you to appreciate the sounds of the world around you for years to come.

BLUETOOTH® TECHNOLOGY

WE BELIEVE THE FUTURE OF HEARING PROTECTION INCORPORATES WIRELESS COMMUNICATION

ISOtunes® utilize the latest Bluetooth® technology to maximize the potential of your hearing protection experience. Our Bluetooth hearing protectors seamlessly integrate with your favorite devices and, ultimately, whatever lifestyle you live.

- Hands-free calling
- DualConnect: connect to two devices at once
- Voice command activated
- Supports iOS battery life indicator*
- Wireless range of 30+ feet

*ISOtunes® products supports Bluetooth® battery level indicator. This means that when connected to iOS devices, the battery power status can be seen in the upper right corner of the screen. Please use this as a guideline - there are many factors to battery level accuracy that influence this measurement.

NOISE CANCELING MIC

MUTE THE WORLD... EVEN WHILE YOU TALK

One of the greatest benefits of Bluetooth headphones is that you can seamlessly make and take calls from your phone while keeping your hands free. But do your current Bluetooth headphones suppress noise from your environment to create clutter-free clarity for your listener on the other end?

ISOtunes® do.

Our built-in microphones contain noise suppression and echo cancellation technologies that block steady-state noises like mowers, blowers, fans, vacuums, tractors, motors, engines, and the like so you can increase productivity by taking calls in loud environments.

This helps listeners on both ends of the line hear each others' voices, and NOT the world around them.

PROVEN DURABILITY

ISOTUNES® ARE BUILT TO LAST, AND BACKED BY A BEST-IN-CLASS 1-YEAR WARRANTY

Your work can get dirty and your headphones need to be able to withstand exposure to the elements. We design our products to meet the toughest standards for use in your workshop, yard, jobsite, and beyond.

ISOtunes® durability ratings by product:

ISOtunes® Wired: IPX5 water and sweat resistant

ISOtunes® Original: IPX3 water and sweat resistant

ISOtunes® Xtra: IP45 water, sweat, and dust resistant

ISOtunes® PRO: IP55 water, sweat and dust resistant

SAFETY PRECAUTIONS

WHILE USING ISOTUNES®

Are there any environments in which it is not safe to use ISOtunes products?

ISOtunes® products do an excellent job of blocking outside noise. As such, they should NOT be used in environments where users need to be fully aware of their surroundings for personal safety reasons. For example, we do NOT recommend using them while driving a car or riding a motorcycle. Similarly, we do NOT recommend them for use when riding a bicycle outside. The user is solely responsible for ensuring that ISOtunes® products are used ONLY in safe environments.

Are ISOtunes® approved for use in my workplace?

Each workplace has its own rules and restrictions on what can or must be used to ensure prevention of hearing loss. For most facilities, the main requirement is that the Noise Reduction Rating (NRR) for the devices is sufficient.

Simply ask your manager or company's Safety Official to determine whether or not ISOtunes® products are suitable for your workplace. And when using ISOtunes products, please abide by the rules established by your place of employment.

for the workshop

THE STANDARD IN WORKSHOP HEARING PROTECTION

Whether you're welding or running a miter saw, jigsaw, planer or jointer, it's hard to ignore one simple fact: shop tools are loud. But it doesn't end there – they can cause severe long-term hearing loss and tinnitus if used without hearing protection.

ISOtunes® are the new standard in workshop hearing protection. They're lightweight, durable earbuds that are proven to block loud noises while allowing you to stay connected to your phone for streaming music and taking phone calls in the shop. Every ISOtunes® product is ANSI-certified and OSHA-compliant, so you can rest assured that you're doing the right thing for your ears.

Each ISOtunes® product also includes our signature background noise-cancelling microphone technology, which allows you to use many tools and machines without interrupting your phone calls. Our microphones pick up steady-state noises like saws, fans, and vacuums and cancel them out so the person you're talking to can't hear them. Checkmate, power tools.

ISOtunes® products are also much smaller than their earmuff alternatives. Weighing merely grams and fitting into any pockets, ISOtunes® products can be brought anywhere and used comfortably anytime... even when it's 100+ degrees outside.

FOR LAWN CARE

Muffs are too hot and too heavy. There, we said it. Chances are, you were already thinking it anyways. If you haven't done away with them yet, you will after meeting ISOtunes®.

ISOtunes® are lightweight, durable, certified hearing protectors that allow you to stream music and take phone calls while protecting your hearing at the same time – essential for lawncare professionals in the modern age. Our products are ANSI-certified and OSHA-compliant, so you can have no reservations about using them for work. That's precisely what they're made for.

Tired of turning off your equipment to take calls? We thought you might be. That's why each ISOtunes® product includes our signature background noise cancelling mic that eliminates steady-state noises like mowers and blowers so you can take calls while keeping your equipment running. How's that for increasing productivity?

3-IN-1 HEARING PROTECTION, MUSIC, AND CALLS

Power tools, equipment and heavy machines are constantly wearing you down as you work. The noise exposure is not only exhausting, but dangerous and damaging, especially over time. If you want to keep your hearing until a ripe old age, you're likely already doing what you can to protect it. But now you can do more than just protect it.

ISOTunes® aren't just hearing protectors, they're also the most effective way to stay connected while on the job site. Whether it's one-touch for phone calls or wireless access to all your music, ISOTunes® bring the power of your phone right to your fingertips, in the form of lightweight, durable earplug headphones.

Each ISOTunes® product also includes our signature background noise-cancelling microphone technology, which allows you to use many tools and machines without interrupting your phone calls. Our microphones pick up steady-state noises like saws, fans, and vacuums and cancel them out so the person you're talking to can't hear them. Checkmate, power tools.

THE PROTECTION YOU NEED, THE CONNECTIVITY YOU WANT

Noise exposure in the workplace is a common problem, but many hearing protectors fall short of today's standards for workplace connectivity and enjoyment. Meet ISOtunes®, the hearing protectors employees actually *want* to wear.

ISOtunes® are lightweight, durable, earplug headphones that allow users to stream music and take phone calls while significantly reducing harmful background noise. Our products are ANSI-certified and OSHA-compliant, made specifically for working professionals.

ISOtunes® are engineered with these exact workers in mind: Bluetooth® connectivity is supplemented by the added benefit of noise isolation through proven hearing protection. It's true noise isolation for a better work experience.

While ISOtunes® aren't suitable for all industrial environments, for those that are appropriate, ISOtunes® have contributed to significant improvements in workplace productivity and connectivity, as well employee enjoyment, appreciation, and retention.
