

*Sleep
Outside™*

KLYMIT ®

2018 - 2019 CATALOG

A close-up, low-angle shot of a campfire at night. The fire is built with several logs and is burning brightly, with a large plume of orange and yellow sparks rising into the dark sky. The sparks are captured in motion, creating a dense, starry pattern against the black background. The overall mood is warm and cozy.

Sleeping comfortably in the outdoors has never been easier.

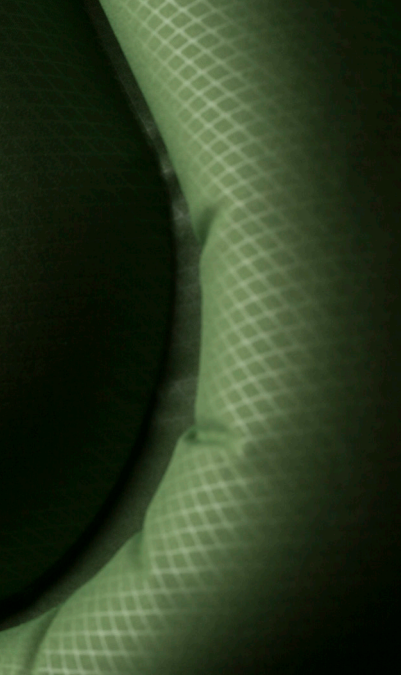

At Klymit, we focus on one thing:
improving the outdoor sleep experience.

We're an engineer-led team of adventurers who make gear that makes sense. It's comfortable, easy to use, reasonably priced and guaranteed for life.

Our brand reflects our love of the outdoors, and our desire to help everyone wake up refreshed and ready to do what inspires them.

the Sleep Outside[™] Setup

Everything you need to sleep
as comfortably outdoors as
you do in your own bed.

The

*Static V
Collection*

Over-engineered, not overpriced

Since the inception of the original Static V®, 15 new iterations have been engineered for every body and every adventurer—from the ultralite explorer to the family car camper and everyone between. It's no wonder the Static V® has earned a loyal following, making Klymit the fastest growing sleeping pad company in the world.

MAIN FEATURES

Raised V-Chambers create ultra-comfortable loft pockets that support your body's pressure points from head-to-toe, giving side, back, and stomach sleepers a generous bed of air

Deep wells between air chambers maximize the loft and warmth of your sleeping bag

Dynamic side rails keep you in place through the night for a more restful sleep

High quality, durable fabrics are soft against the skin, quiet to sleep on, and easily pack down to a small size

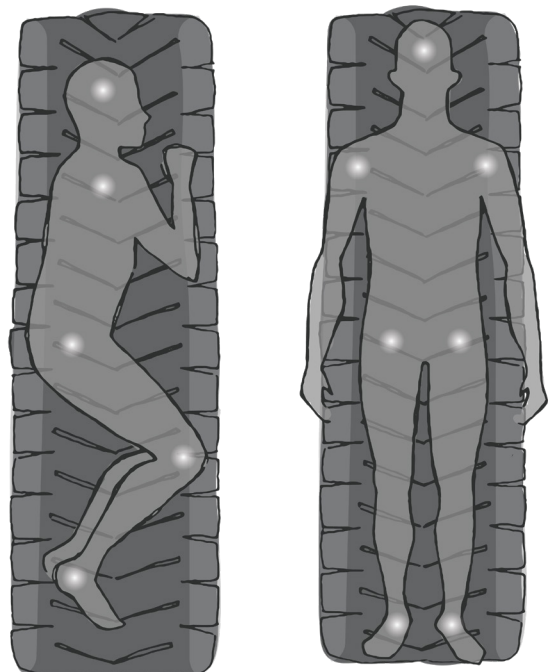

Inflation is fast and easy

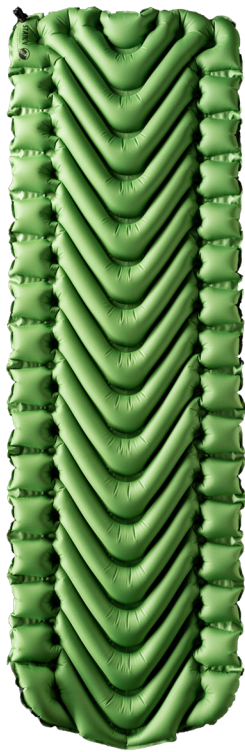

An antimicrobial inner-lining resists harsh environmental factors including condensation, so your pad can perform for years to come

Lifetime warranty on every pad

Inflation is fast and easy; compatible with Rapid Air™ pump

A close-up photograph of a person's hands and arms as they dig in the dirt with a shovel. The person is wearing a blue long-sleeved shirt and a grey and yellow wristband. The ground is brown and sandy, with some dry twigs and roots visible. A bright yellow fabric is partially visible on the right side of the frame. The text "The Inertia Series" is overlaid in a white, cursive font.

*The
Inertia
Series*

Advanced design & engineering for minimalist adventures

Inertia pads are engineered exclusively around features that deliver everything you need and nothing you don't for minimalist backcountry adventures. Each iteration provides support for your head, shoulders, hips, and feet while cutting ounces elsewhere. Unique cutouts in each inertia pad maximize the loft & warmth of your sleeping bag, similar to our V-Chamber wells in the Static V™ line. The result is an unconventional design perfect for a light, portable, and comfortable sleep experience.

MAIN FEATURES

Minimalist Design advanced patterning removes all extraneous material to create an ultralight, minimalist design that delivers comfort and support

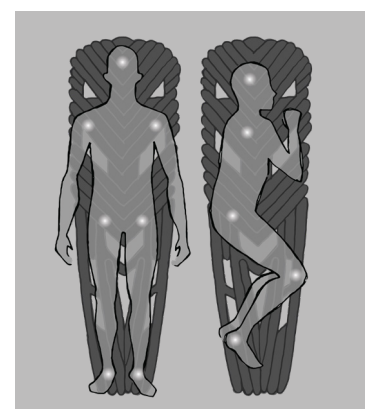

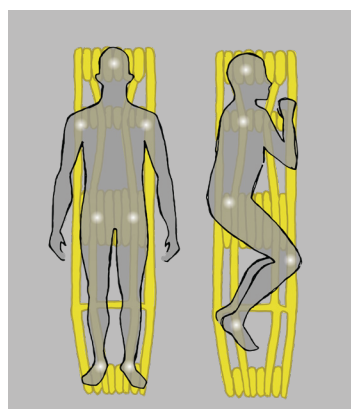

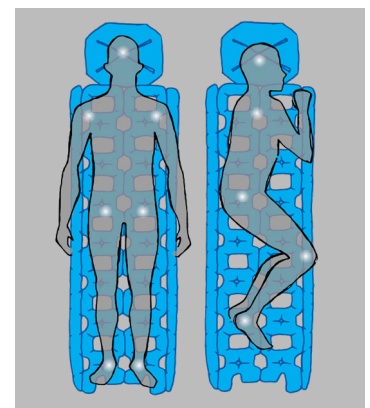

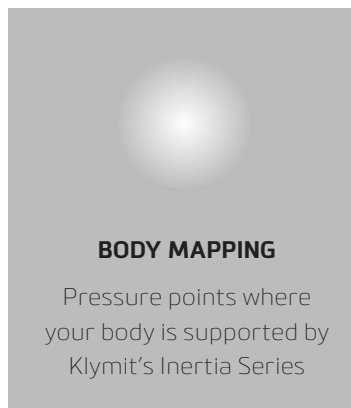

Body Mapping patterning places air only where padding is needed & eliminates them where they are not, allowing us to shed weight without sacrificing comfort

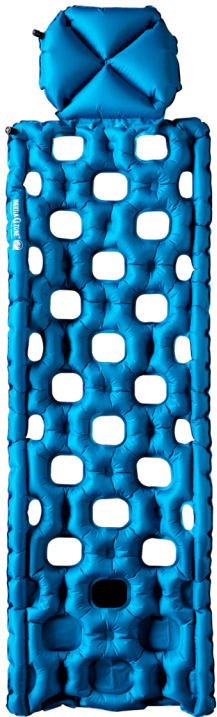

High quality, durable fabrics are soft against the skin, quiet to sleep on, and easily pack down to a small size

Inflation is fast and easy

An antimicrobial inner-lining resists environmental factors like condensation so your pad can perform for years to come.

Lifetime warranty on every pad

*the
K&B
Series*

Engineered with essential features, designed for every body.

The importance of bringing a quality sleeping bag on adventures where the temperature drops at night cannot be stressed enough. We engineer every KSB for optimal thermal performance above all else, because a bag that keeps you warm throughout the night is one of the most important pieces of gear you'll ever own. 650 fill-power down is used in every bag to deliver an exceptional warmth-to-weight ratio, as well as impressive compression ability when it's time to hit the trail. Add to that exclusive features like Length Locks™ that let you adjust your sleeping bag to match your height, as well as an anti-snap two-way zipper, stash pocket, draft collar, stretch baffles, an overstuffed foot box, and oversized options for people who want the space.

MAIN FEATURES

Stretch baffles made with flexible elastic keeps warm down-fill next to your body, and stretches when you move or sit up

Length Locks™ customize the length of the bag to 74" or 67" to eliminate air pockets and maximize warmth

Down-fill keeps you warm while still packing down small

High quality, durable fabrics are soft against the skin, quiet to sleep on

KSB 35 DOWN™

A LIGHTWEIGHT, VERSATILE BAG THAT CONVERTS INTO A BLANKET

Weight	1.9 lb / 862 g
Temp.	35° F / 1.7° C

Pillows

A basic necessity for any comfortable sleep system

When you sleep in your bed at home, a pillow is considered a must. It shouldn't be any different when you're sleeping outside. And no, a rolled up sweater doesn't count. When your head is properly supported, the natural curve of your neck and your shoulders are supported, too. The result is a more restful sleep so you can enjoy your day outside.

MAIN FEATURES

X-Shaped Welds cradle your head while you sleep

Small pack size makes our pillows the perfect accessory to a good night's sleep

High quality, durable fabrics are soft against the skin, quiet to sleep on and easily pack down to a small size

An antimicrobial inner-lining resists harsh environmental factors including condensation, so your pillows can perform for years to come

PILLOW X™

A SUPPORTIVE, ULTRALIGHT, AND INCREDIBLY COMFORTABLE CAMPING PILLOW

Backpacks

Feature-rich packs that make it easier to stay comfortable on the go

Utilizing many of the same engineering principles from our V-Chambered Static V™ line of sleeping pads, we've introduced a whole new category of backpacks : Airframe™ support. This innovative approach to weight distribution uses pressurized air to direct the load toward your center of gravity while maintaining optimal hip comfort, spine support, and shock absorption. Every Airframe™ pack also features a hand pump that conveniently stows away and can be used when necessary to fine-tune the air pressure in your frame for truly personalized comfort. Our feature-rich packs are the best way to carry your entire Klymit sleep system.

MAIN FEATURES

Airframe™ leverages the tech and comfort of our sleeping pads in a pack frame

Adjustable pressure integrated pump allows on-the-fly adjustments to control level of padding, support and flexibility

Full range of motion the technology's inherent flexibility allows the pack to move with your body for exceptional balance and agility

Ultralight because it uses air, not plastic or aluminum
