

Guide Rod Laser for GLOCK 20/21/41 (Gen 4)

At One with the Gun™

The LaserMax Guide Rod laser emits a brilliant aiming point that enables fast, accurate target acquisition while dramatically increasing the speed of follow-up shots. Field tested through over 20 years of combat experience by SWAT, Special Forces, federal agencies and other armed professionals, this legendary sight system upgrades the firearm factory spring guide and recoil spring assembly with a ruggedized laser assembly.

Contained entirely within the firearm, the Guide Rod Laser is the smallest and most robust laser sighting system available today. The sight does not restrict holster choice or effect grip ergonomics in any way.

RED LASER

SKU: LMS-G4-1151

GREEN LASER

SKU: LMS-G4-1151G

Features

- Easily user installed - only basic field stripping required
- Guaranteed to be within 1-inch POA at 10 yards with no adjustments needed
- Pulses for higher visibility and fastest recognition
- Proximity to bore ensures best accuracy

Specs

Weight	0.8 oz.
Wavelength	634 nm (red), 520 nm (green)
Power Output	<5mW
Battery Type	Silver Oxide
Battery Life	About 40 minutes
Adjustment	Factory aligned at 10 yards
Dot Size	0.20" x .45" (red), 0.33" (green) at 10 yards
Water Resistant	Yes
Temperature Range	15F to 120F
Warranty	5 years
