Thanks for your interest in reloading

IF YOU HAVE NEVER RELOADED BEFORE, you're in for a treat. While some would have you believe it is rocket science, nothing could be further from the truth. If you can replace a light bulb (screw in a die), measure with a teaspoon (dip a powder charge), shove a cork into a bottle (seat a bullet) and can read and comprehend this description (read instructions), then you're all set.

PRIME

ELOADING IS AN ENJOYABLE HOBBY, saves you money—and no manufacturer saves you more than Lee Precision, Inc. Our mission is simple: produce <u>the best American made value in reloading tools</u>. Our great prices come from patented, innovative designs. We are thankful to say that Lee Precision products are cast, machined and assembled in the USA.

A reloading press and a set of Lee Dies are all you need to start reloading. Lee Dies come complete with powder dipper, shell holder and instructions, along with comprehensive load data that tells you how much and what type of powder to use. Dies and presses last a lifetime, so buying what your budget allows makes the most sense. For those with a workbench, consider our Lee Bench Plate for the ultimate convenience in mounting your presses. If you don't have a workbench, consider the Lee Reloading Stand, built for the ultimate in rigidity and convenience.

If you have no loading equipment and are just getting started, you must consider that these basic steps need to be taken below.

SEAT&CRIMP

Check out our complete line of reloading and casting equipment on our website, then visit your local merchant. If not blessed with a local dealer, one of the many online dealers will quickly and economically fill your order.

ACCESSORIES

Lee Reloading Stand

At last, a reloading stand built just for your reloading needs. The sturdy powder coated steel stand places your press at the perfect counter stool or standing height. Three-leg design assures absolute stability regardless of the floor condition. Rubber tipped legs suitable for any surface.

The thick steel top is fitted with the patented, quick change Lee Bench Plate System with steel base block to fit all Lee metallic presses.

> The stand also includes a sturdy steel shelf with two bench plate receivers that will neatly and securely store your extra presses or mountable accessories. Each leg has eight mounting holes that allow you to accessorize your stand with a multitude of bins,

> > shelves or accessory racks. Dimensions 39" high x 26" wide x 24" deep

90688

DIE RACK

Sturdy steel rack with fasteners designed for the Lee Reloading stand. Conveniently holds your dies at the ready, especially helpful when loading small batches of ammo with frequent die changes. Can also be wall or bench mounted. 90680

BIN AND BRACKET

Sturdy steel bracket and parts bin. Includes fasteners to allow direct mounting to the Lee Reloading stand, or workbench. Perfect for holding bullets, cases and loaded rounds. **90687**

STEEL BASE BLOCK Rigid, powder coated steel construction. First choice for mounting all current Lee Presses. Works with the Lee Reloading Stand and Bench Plate. Fasteners for mounting one Lee reloading press are included. **90267**

JUST REMOVE

AND REPLACE

PATENTED DESIGN ALLOWS INSTANT PRESS CHANGE. SO STURDY YOU CAN RESIZE THE MONSTER 50 BMG CASE, THEN QUICKLY SWITCH TO A SMALLER PRESS FOR PRIMING OR OTHER OPERATIONS. TRAPEZOIDAL BASE BLOCK SLIDES INTO PERFECT REGISTER AND MADE IMMOVEABLE WITH THE QUICK TIGHTENING OF FOUR BOLTS.

Lee Bench Plate

Includes steel base block with holes to mount any Lee press. Powder coated, thick steel plate mounts quickly and securely to any bench or tabletop. Wide steel plate distributes load, adding rigidity to the lightest bench top.

MODERN RELOADING

SECOND EDITION BY RICHARD LEE

Learn to reload ammunition that's more accurate than your first try

The Second Edition of MODERN RELOADING is a summary of a lifetime of experience. No matter how knowledgeable you are, you will find new and interesting information in this book. It is a reference book you will keep forever.

OVER 36,000 LOADS covering over 170 cartridges in a new, larger, easier to read format, with velocities for starting loads. This is the best kind of load data — it is supplied by the powder companies.

LOAD DATA SORTED by velocity decending order.

DIPPER AND AUTO DISK DATA included for easy setup.

NEW, LARGER, EASIER TO READ FORMAT

with computer rendered and dimensioned drawings. Cartridges tabbed for quick reference.

LATEST INFORMATION ON PRESSURE

EXCLUSIVE PRESSURE AND VELOCITY FACTORS

enable you to accurately calculate pressure and velocity for reduced loads. An absolute necessity for cast bullet shooting.

A NEVER BEFORE PUBLISHED in depth analyses of current load data. It gives you insight into the effects of reducing or increasing a charge.

MODERN RELOADING SECOND EDITION 90277

MODERN RELOADING SECOND EDITION RICHARD LEE

Contains everything about reloading with the world's most comprehensive load data

UPDATED

2016

SELECTING THE BEST HANDGUN DIE SET

LEE HANDGUN DIES feature a carbide sizing die — simply the best way to resize straight walled handgun cartridges.

Select the **DELUXE PISTOL 4-DIE SET** when using mixed range brass or brass that was fired in others guns. The Deluxe set includes the **CARBIDE FACTORY CRIMP DIE**. This die allows you to separate bullet seating from the crimping operation. It makes setup much easier and the die has the added feature of a carbide resizer that does a finishing sizing pass on the completed round. This final sizing guarantees that any case that passes through the die will freely and reliably chamber in any gun.

The **CARBIDE & STEEL THREE DIE SETS** work fine when using a quality controlled source of brass, like cases fired only in your gun. More care is required when adjusting the bullet seat and crimp die, as seating and crimping occur simultaneously. Bullet diameter control is important when not using the factory crimp.

Lee Dies reload cartridges better, easier, more accurately and with fewer problems!

CARBIDE FACTORY CRIMP DIE

Carbide ring in base resizes any portion of case that exceeds factory new dimensions. Floating crimp ring is finger adjustable to provide the perfect crimp

HARDENED STEEL SHELLHOLDER

Exclusive feature to Lee POWDER MEASURE & CHARGE TABLE

Exclusive feature to Lee POWDER THROUGH EXPANDING DIE

Only Lee Dies permit charging the case while expanding the case mouth. Every Lee Pistol Die Set includes this **POWDER THROUGH EXPANDING DIE** at no extra cost. The powder funnel adapter can be replaced with a Lee case actuated Powder Measure (pgs 32-33) for fully automatic powder charging while the case mouth is being expanded.

ONLY LEE DIES COME COMPLETE WITH POWDER MEASURE and CHARGE TABLE

CONTOUR GROUND CARBIDE SIZING DIE

Carbide Sizer

All Lee straight walled pistol dies have tungsten carbide sizer rings. Carbide is so hard that it can only be ground and polished with diamond wheels.

This hard diamond polished surface eliminates the need for case lubrication—they will never wear out. Exclusive contour grind sizes closer to the rim than any other brand.

The collet held decapper is nearly unbreakable even if you misadjust it or deprime crimped primer military cases.

The decapper clamp collet accurately centers the decapper in the die. Should you over stress it for any reason, it harmlessly slides up without breaking. Easily reset with no limit to the amount of times it can be reset.

BULLET SEAT & FEED DIE

Lee Bullet Seat and Feed Die

Universal free floating seating plug works with nearly any point style bullet. No need to change seater plugs for different nose types. Finger adjustable seating depth eliminates fumbling with pliers, lock nuts and screwdrivers to make simple seating depth adjustment. Die is tapered on end for use with automatic bullet feeders.

LEE CARBIDE DIES are used in commercial loading machines that cycle four to five thousand times per hour. You can't wear them out with personal use. These are the most copied dies ever invented. The competition tries to copy our dies, but come up short. Only Lee puts it all together to make the best pistol dies money can buy. Reloaders buy Lee Dies because they are the best made and have the most features. No other brand can compare!

Lee Deluxe Pistol 4-Die Set

Combines the world's most popular carbide three-die set with the Lee Carbide Factory Crimp Die at a great price. No other die set at any price produces more reliable or accurate ammo.

By separating the seating and crimping operation, you will benefit by greatly simplified adjustment. More importantly, the Carbide Factory Crimp Die post sizes your case, assuring that any round that passes through the die will chamber properly in your gun. This, plus all the other exclusive features - make this the best die set money can buy!

Lee Carbide Pistol 3-Die Set

We use a solid carbide insert, ground to a special contour that does not leave the objectional belt mark on the case, common to ordinary carbide dies. With a carbide sizer, no case lube is needed, and you don't even have to clean your cases.

> NO NEED FOR A TAPER CRIMP DIE; BETTER ACCURACY WITH LEE DIES.

Taper crimp dies are used to correct the problems caused by the improper expanding plug design or adjustment. They distort the bullet shank and reduce accuracy. Because the Lee Expander flares the minimum amount, consistent with easy bullet insertion, all of the flare is removed with the bullet seating die, thus eliminating the need for a taper crimp die.

Lee Very LTD Pistol 4-Die Set

Same features as our 3-die carbide die sets, except the case must be lubricated. Includes a taper crimp die.

Lee Steel Pistol 3-Die Set

Same features as our premium carbide sets, except the case must be lubricated.

Lock rings are easily adjusted and tightened with fingers only. No tools are needed. Yet they will never loosen or move while reloading.

Storage is easy

Lee Dies are packed in a fitted box that allows dies to be returned to the box adjusted with or without the Lee Breech Lock bushing installed.

ROUND DIE BOX LEE DIE BOXES

lets you store dies installed Perfect storage for dies. Made from tough, durable plastic.

Lee Bulge Buster Kit

Assure your mixed brass is bulge free with the Bulge Buster Kit and appropriate Lee Carbide Factory Crimp Die. This push through die adapter will quickly remove the annoying bulge rings that shell holder constrained dies simply can't reach. The Bulge Buster Kit includes extension sleeve, push through punch, catch container and complete instructions. And it's fast — you can reprocess your cases as quickly as you can handle them.

BULGE BUSTER KIT 90487 CARBIDE FACTORY CRIMP DIES, SEE BELOW

Lee Bulge Buster Kit will help you

Lee Carbide Factory Crimp Die

INCLUDED WITH

4-DIE SETS

DELUXE

A carbide sizer sizes the cartridge while being crimped so every round will positively chamber freely with factory like dependability. The adjusting screw quickly and easily sets the desired amount of crimp. It is impossible to buckle the case as with a conventional bullet seating die. Trim length is not critical so this extra operation takes less time than it would if cases were trimmed and chamfered.

Revolver dies roll crimp with no limit as to the amount. A perfect taper crimp is applied to auto-loader rounds. The crimper cannot be misadjusted to make a case mouth too small to properly head-space. A firm crimp is essential for dependable and accurate ammunition—it eliminates the problems of poor ignition of slow burning magnum powders.

Taper Crimp Die

The Lee Taper Crimp Die is hardened steel, designed to overcome crimp problems caused by poor die design. These dies offer little or no advantage when used with 1986 or newer Lee Dies, as the crimp angle is already a modified taper crimp. Jacketed bullets must have a crimp groove.

TAPER CRIMP DIE

DIE

Lee Collet Style Factory Crimp Die

POPULAR WITH CAST BULLET SHOOTERS that wish to use oversize bullets, also very popular when reloading for heavy recoiling revolvers. No other crimping system can apply as secure a crimp as the Lee collet style Factory Crimp. No crimping groove required in jacketed or cast bullets, the die is so powerful it will form a crimp groove if one is not present.

RELOADING DIE OVERVIEW **RIFTLE** 1

THE BEST RIFLE DIE SET

LEE PACESETTER DIES & RGB SERIES

For producing factorydimensioned ammo that reliably fits and feeds in any gun. First choice for semi-auto actions. Full-length sizing is a must if you are reloading for more than one firearm or reloading cases that were fired in other firearms. Pacesetter 3-die sets include the LEE FACTORY CRIMP DIE.

LEE COLLET NECKSIZING DIES

For best accuracy, longest case life and no resizing lubricant. Only the neck of the case is resized. The body is untouched—retains perfect fit to your gun's chamber. Cases should have been fired in your firearm only, and reloaded rounds are intended for use in just one firearm. These are the favorite of the bench rest crowd as there is no other die that can produce a more accurate cartridge.

If you intend to reload cases fired in other guns or you are reloading for more than one gun, select the **ULTIMATE RIFLE DIE SET**. The Ultimate set includes a full length resizing die that allows you to restore any case to factory original dimensions so that you can fire form in your gun and then reload using the superior Collet neck sizing die. Ultimate Rifle Die Sets include the LEE FACTORY CRIMP DIE.

Lee Factory Crimp Die

The Lee Factory Crimp Die is the only effective way to crimp bottleneck rifle cartridges. Our Factory Crimp Die should be used on all loads used for hunting. Applying a factory crimp will always improve the utility of the cartridge, and in most cases, will also improve the accuracy.

The Lee Factory Crimp die crimps the bullet in place more firmly than any other tool. It is impossible to buckle the case as with regular roll crimp dies. Trim length is not critical. Tests demonstrate that even bullets which have no cannelure will shoot more accurately if crimped in place with the Lee Factory Crimp Die.

Factory ammunition is often more accurate and better able to withstand rough handling because the bullet is firmly crimped in place. A firm crimp improves accuracy because pressure must build to a higher level before the bullet begins to move. This higher start pressure insures a more uniform pressure curve and less velocity variation. Even powder selection is less critical. Until now, handloaders seated the bullet to touch the rifling to achieve similar results. This is not always possible nor desirable. The Lee Factory Crimp Die is included at no extra charge with Lee PaceSetter 3-Die Sets and Ultimate Rifle Die Sets. It's just another added value that only Lee Dies offer.

NO CRIMP GROOVE REQUIRED EVEN WITH JACKETED BULLETS

UNIVERSAL PRESS SHELLHOLDER SET 90197

Work with all brands of presses

internal finish in the industry

ALL LEE DIES ARE MACHINE HONED TO THE SMOOTHEST POSSIBLE FINISH

Don't confuse this with the surface polish that's used by most manufacturers. A polish simply makes a shiny surface. It's like trying to sand wood without backing under the sandpaper. The surface in Lee dies is progressively honed to a fine finish with no waves or ripples.

LOAD DATA & INSTRUCTIONS

Lee PaceSetter™ 2-Die Set

The same features and quality of our standard dies, but do not include a

Lee Factory Crimp Die. You'll find no

better die at any price. Half the price

of competitive dies and theirs don't

INCLUDES THE EXCLUSIVE LEE FACTORY CRIMP DIE

Lee PaceSetter™ 3-Die Set

These dies are your best buy! Lee PaceSetter 3-Die sets include the exclusive Lee Factory Crimp™ Die to produce factory-like ammunition with improved utility and accuracy. The die set also includes an easy adjust dead length bullet seater, shell holder, powder dipper, load data-and all are packed in the nicest storage box ever designed.

MINGTON

Lee Resizing Lubricant

Another first by Lee. We purchased the finest automotive deep draw lubricant and had it custom packaged exclusively for us. Lee lube is pleasant to handle and you can thin it with water. Non-sticky, nonallergenic. Very little is needed; it goes a long way. Eliminates stuck and dented cases and makes sizing less work. 2 OZ. TUBE 90006

Our dies also include the correct shellholder and powder measure.

Includes SHELLHOLDER • POWDER DIPPER • LOAD DATA

RGB Dies

Compare to other brands costing twice as much and you'll recognize what a fantastic bargain they are. We offer these only to show that when you buy Lee Dies - without all of the extras Lee customers have come to expectthe price is significantly lower, yet the quality is the best. Our tolerance is 50% less than the advertised amount of a popular and expensive brand. We guarantee these dies to be better than any other brand. If for any reason you're not 100% satisfied—just return them to the factory with your sales slip and pay the difference of what you paid and the manufacturer's catalog list price of the dies you want. We will ship them to you with our thanks for trying ours.

GUARANTEED TO LOAD THE WOST ACCURATE A MINILYNI TICOM OR YOUR WONEY BACK

NO LUBRICATION REQUIRED GUARANTEED ACCURACY EXTENDS CASE LIFE 10X FASTEST TO USE

NO CLEANING OR LUBING REQUIRED

Lee Collet Dies

There is no loading system that will load more accurate ammunition than Lee Collet Dies. We guarantee it in writing with every set. No one but Lee has ever dared make a guarantee like this — *SMALLEST GROUP SIZE OR YOUR MONEY BACK*. A collet squeezes the case neck against a precision mandrel for a perfect bullet fit with minimum run-out. No case lube is needed. Cases last ten times longer, so the savings on only 35 cases will pay for the dies. Maximum accuracy is usually achieved by seating the bullet out far enough to touch or almost touch the rifling. This provides the shot start pressure normally supplied by the crimp. That's why a dead length bullet seater is included to complete the most accurate reloading system ever made. These dies size only the neck to preserve the perfect fit of fire forming. Only reload cases that have been fired in your gun. Not recommended for autoloaders, slide or lever action guns. See list of sizes on pages 14-15.

Lee Ultimate Rifle Die Set

Choose this die set for maximum versatility. The set features a FULL LENGTH-RESIZING DIE to return brass to factory new dimensions, perfect for reloading brass fired in other guns. The COLLET NECKSIZING DIE is used on your fire formed brass giving you best possible accuracy. No case lube required and cases last almost forever. The EASY ADJUST DEAD LENGTH BULLET SEATING DIE foolproofs the bullet seating adjustment, and assures perfect seating depth every time. THE FACTORY CRIMP DIE provides a secure crimp on bullets with or without a crimp groove. In most cases, it helps accuracy by providing a uniform higher start pressure and gives the finished cartridge factory-like accuracy and dependability.

The set is complete with shell holder, powder measure and famous Lee load data featuring all common brands of powder organized in an easy to read logical format.

IN ADDITION TO BEST ACCURACY, YOU GET THESE BENEFITS

NO CASE LUBRICATION REQUIRED WITH COLLET DIE REDUCED OR ELIMINATES CASE TRIMMING TEN TIMES INCREASED CASE LIFE UNMATCHED SPEED AND CONVENIENCE MINIMUM BULLET RUNOUT MOST UNIFORM NECK TENSION

LEE COLLET DIES ACCURACY CONTRIBUTES TO WORLD RECORD

While competing in a regularly sanctioned 1000 YARD MATCH on July 25th, 1993, Robert Frey established a new 1000 yard world record. We're honored he used the Lee Collet Die to load his record setting ammunition. World record breaker Robert Frey commented : "The Lee Collet Neck Sizing Die enables me to get top accuracy from my rifles (match and hunting). The design principle of sizing the case neck to a mandrel is unmatched for accuracy potential by any other dies. It is one of the best ways to make all of my rifles shoot their tightest groups." 2-

16 **LIFE** RELOADING PRESS **OVERVIE**

RELOADING PRESSES LAST A LIFETIME, so buying on what your budget allows makes the most sense. You'll never regret buying a value priced press — you'll always have a need for a simple press for miscellaneous jobs.

All Lee Presses feature compound toggle linkages. This permits full length sizing the largest magnum cases with

SINGLE STATION PRESS OPTIONS

RECOMMENDED FOR NEW RELOADERS OR THOSE WHO PREFER TO BATCH LOAD

SINGLE STATION PRESSES will load nearly any cartridge. Cartridges are loaded in a batch process—for example, 20 cases are de-primed and sized, charged, then bullets seated. This die changing process is sped up by the LEE BREECH LOCK QUICK-CHANGE SYSTEM. Rifle case reloading is best accomplished on a single station press. For a beginner, a single station press in a kit is the best value.

ease. Many feature built-in spent primer catchers, tough powder paint coating and detailed instructions. Under normal use, all our presses will last a lifetime. For those that simply want the best, you can't beat the "Classic Cast."

TURRET PRESS

TURRET PRESSES offer single station simplicity with near progressive speed. No need to unscrew dies; the turret advances to the next station automatically. Four pulls of the lever and you have a completed round. Perfect for moderate production of handgun ammunition. Deactivate the Auto-Index feature and you can batch reload the longest rifle cartridges. Twist and exchange the turret, snap in a new shell holder, and you're ready to load your next cartridge.

PRO 1000

LOAD-MASTER

DESIGNED FOR VERY HIGH PRODUCTION of handgun cartridges. Add a bullet and pull the lever; other operations are automatic. Select these presses only if you are shooting more than 500 rounds per week.

If loading limited quantities of many different cartridges, a Turret Press is your best choice. Changeover from cartridge to cartridge can become involved on the progressive presses.

The Classic Lee Loader

For more than 55 years, more shooters have chosen the famous Lee Loader for their first reloading tool than any other. They realize it is all they need for good, accurate ammunition. In fact, at one time ammunition loaded with a Lee Loader held a world record listed in the GUINNESS BOOK OF WORLD RECORDS for more than seven years. Millions upon millions of rounds have been reloaded with the famous Lee Loader, and we expect it will continue to be a most popular reloader for many years to come. It's the perfect tool for those who wish to simply try reloading, because it will pay for itself in just an hour or two. Find out for yourself how much fun it is to reload with the Lee Loader. Everything you need to begin loading one caliber and you'll save enough to pay for it in the first hour! LEE LOADER

BIG GUN INSPIRED BREECH LOCK QUICK CHANGE

is now standard on most Lee single station presses. Switch dies with a $\frac{1}{6}$ of a turn rather than fourteen or more turns. Loading with a breech lock equipped press is convenient as a Turret press when loading small quantities of ammunition. Interrupted three-start thread assures dies will return and

lock into the exact same position. The BREECH LOCK SYSTEM includes a lock pin to allow easy initial setup. If cost is more important than convenience, you can leave the Breech Lock bushing locked in the press and screw dies in and out like a conventional press.

Lee Breech Lock Hand Press

Now with the Lee Breech Lock System! A full size hand held reloading press, yet the tool weighs only 1¾ pounds and costs so little you will want more than one. No matter how much equipment you have,

it's great to have a portable hand press. No time is wasted mounting a tool to a work bench. When you're finished—just pack it away.

Breech Lock Hand Press Kit

THE PERFECT PORTABLE RELOADING PRESS KIT

Begin reloading at once. No wasted time mounting to a work bench. Pack it all in the box when finished. Great for apartment dwellers or loading at the range. Dies not included.

Primes on the press up-stroke for a more sensitive feel. Includes easy to change punches for both large and small primers. Fits all brands of presses. Same tool as supplied with the Hand Press Kit.

90106

‡ Calibers requiring considerable force for sizing.

Breech Lock Challenger Press

The "O" frame press by design is the strongest and the most popular style press by far. Large opening and long stroke handles the largest belted magnums with ease. The primer catcher is positive and routes the spent primers directly to the trash can. Priming is a dream with the LEE LEVER PRIME SYSTEM. Best of all, it includes the BREECH LOCK QUICK CHANGE DIE SYSTEM. Change dies instantly with a twist of the wrist; you'll never have to re-adjust your die.

Other features include all steel linkage with adjustable length lever. This same press will cost you more than twice as much from other manufacturers, and that's without all of the Challenger's features.

90588

T.BIRI DEB SCAL

Perfect kit for someone starting out, but wants more than the basics. We have taken the worlds most popular Breech Lock Challenger press and combined it with the best accessories at a price less than what others charge for a "basic kit." Highlights are the New Deluxe Perfect Powder Measure, Auto Bench Prime with shell holder set, Deluxe Quick Trim and a copy of the latest version of Modern Reloading featuring over 36,000 loads for over 170 cartridges. Plus the other case prep tools found in other kits.

T. THE

This kit and a set of Lee dies is everything you need to start reloading, and it's all the best products, so you'll never outgrow the kit.

Breech Lock Challenger Kit

Features the same components as the 50th Anniversary Kit, but we have replaced the Safety Prime with the New Auto-Prime and a set of Auto-Prime shell holders. This kit is for those who prefer to prime off the press. (Shown with optional Bench Plate. Order #90251)

PRIMER ARMS

LOCK-RING ELIMINATOR

Breech lock quick change bushing with integral lock collar provides unmatched precision and convenience when adjusting dies. Split clamp positively locks die into position. Perfect when using other brands of dies in your Breech lock press.

GET AN ADDITIONAL TURRET FOR YOUR LEE PRESSES

EXTRA TURRET, 4 HOLE 90269

A MACHINE THAT DOES IT ALL

This press has all the features of the award-winning Turret Press with the quality touches that make this the finest, most convenient press to own. The Classic Turret features the solid steel linkage of the Lee Classic Cast. Your first stroke of the hardwood gripped lever will convince you this is one solid, silky smooth press!

Spent primers collected and dropped into a flexible plastic tube for easy emptying.

CLASSIC TURRET PRESS KIT

Classic Turret Press Kit

THIS KIT AND A SET OF LEE DIES is everything you need to begin reloading pistol ammo. The Classic Turret Press is fast and convenient when loading handgun cartridges, with rates in excess of 250 rounds per hour possible.

The kit includes the AUTO-DRUM powder measure and powder measure riser, perfect for all handgun and rifle cartridges. Large and Small SAFETY PRIME are included making on press priming an ease. INSTANT CHANGE TURRET makes changing calibers a snap. Deactivate the auto-index and batch load the longest and largest rifle cartridges.

Complementing your press kit are the case conditioning tools to prepare your brass for loading. Includes CUTTER, LOCK STUD, CHAMFER TOOL, small and large PRIMER POCKET CLEANER, and a tube of LEE CASE SIZING LUBE. Complete it with the cartridge specific CASE LENGTH GAUGE. Verify your loads with the included LEE SAFETY POWDER SCALE.

Completing the kit is *MODERN RELOADING SECOND EDITION*, 2016 revision with all new load data covering over 170 cartridges with more than 36,000 loads. **90304**

EQUIPPED WITH THE LEE LEVER PRIME SYSTEM[™]

Value Turret Press

Proven design with compound leverage. No spring in this turret design. The turret is locked into a solid steel ring with big rifle bolt type lugs. Exclusive design puts the lugs on the circumference so there can be no tipping. The linkage is so powerful that the largest magnum cases are sized with ease. Effort required is so small that the usual heavy bench is not essential. The Lee Turret Press has built-in primer catcher and a comfortable roller handle. Even if you do not need all of these features, why pay more for anything less? 4 HOLE TURRET PRESS W/AUTO INDEX 90932

Power and strength to spare, plus unequalled convenience. The Lee Turret Press is suitable for loading all rifle and pistol cases, but really shines when loading large quantities of handgun ammunition. This is the most convenient press made.

Only a true progressive press is faster. Includes the LEE LEVER PRIME SYSTEM with large and small primer arms. Features lift out convenience. Works with the LEE SAFETY PRIME.

Lee Safety Prime

Makes priming on the press a delight. Never touch the primers from box to shell. Primer flip tray features a CAD designed flipping surface that instantly rights the primers. Change primer size in seconds. Primers are dispensed with a satisfying click of the primer feed trigger. 90997

> POWDER MEASURE RISER FOR SAFETY PRIME 90041 See page 33

Lee Value Turret Press Kit

The Value Turret Press, along with the Auto-Disk Powder Measure, produces top quality pistol ammo in a hurry.

A finished round with a few pulls of the lever. Disconnect the AUTO-INDEX and it's large enough to handle monster belted magnum rifle cases. When it's time to change calibers, simply lock in a new turret and begin reloading in seconds. In addition to the Turret Press and AUTO DISK POWDER MEASURE, the kit includes the LEE SAFETY SCALE, unmatched for sensitivity, a PRIMER POCKET CLEANER, CUTTER AND LOCK STUD to trim the cases and a CHAMFER TOOL to deburr cases after trimming. Complete the case conditioning tools with the cartridge specific CASE LENGTH GAUGE

A set of Lee Dies is all that is required to complete this reloading outfit. And all of this at a price that will allow you to pay for your investment in a matter of hours. 4 HOLE TURRET W/AUTO INDEX 90928

24 LFF PRO 1000

Lee Pro 1000

Add a bullet and pull the lever; all other operations are automatic. One loaded cartridge with each pull of the lever. Every operation is automatic. Primers, like the powder, are fed only if a case is present. No wasted primers or spilled powder. Alternate loading sequence lets you load only one case at a time. Makes learning easy for the first time user and great for fine adjustments or experimenting. You can start reloading good ammunition minutes after the press is bolted down. Change calibers in just three minutes.

LE PROT

BULLET FEED KIT

The bullet feeder designed to directly fit the Pro 1000 and Load-Master. Automatically feeds bullets into the mouth of the seating die. Aligns bullets more accurately than possible by hand. Increases the cyclic rate from 50 to 100%.

Order from chart at right.

Lee Load-Master

A massive press with advanced features. Ram is 1³⁄₄ inches in diameter. Stroke and clearance sufficient for largest magnum rifle cases. Load rifle and pistol rounds with equal ease. Load progressively or singly without spilled powder or components. Five stations so you can factory crimp and post size. Accepts all popular brands of dies • 7/8 x 14 Automatic indexing with a wedge lock mechanism that will actually hold a ton. Positive and foolproof priming system that is easy and fast to fill. Removable turret. Change calibers in seconds. Automatic 4 tube case feeder (pistol calibers) Loaded round ejector and case catcher. Quick change shell plate. No tools required. Grease fittings, along with hard chrome-plated ram, insure a lifetime of service for even the commercial reloader. Easy to empty primer catcher guaranteed to catch every primer.

This press will convince you that Lee is the quality leader. Every part of this tool was designed to be strong, long lasting, rust-resistant and user friendly. This machine is designed for a life-time of the hardest use.

PRECISION 5-HOLE TURRET with 20 locking lugs takes just seconds to change. 90079

26 LEE AUTO BENCH PRIME

AU-T-O BIFINICIE PRIMIP

HE EASIEST, MOST CONVENIENT BENCH MOUNTED priming tool ever. Symmetrical design allows effortless right or left hand operation. Comfortable lever with just the right amount of mechanical advantage effortlessly seats even the most difficult primers with just finger pressure. Perfect mechanical advantage to feel the primer seating completely home into the primer pocket.

Includes priming assemblies for large and small primers. Made of a water clear tough polymer that allows you to monitor the primers passage from the tray to the primer pocket. Change primer size or shell holder in seconds.

Includes the new folding tray go from box to priming in seconds. Tray has a built-in primer flipping feature allowing direct filling from today's large primer boxes.

The tool mounting holes are spaced for the Lee Bench Plate system (#90251) or can be mounted directly to your workbench.

Uses special, but inexpensive priming tool shell holders, so there's no need to endlessly swap press shell holders to prime.

FASTEST, MOST CONVENIENT HAND HELD PRIMING TOOLS MADE INCLUDES TRAY SIZED TO FIT TODAY'S LARGER PRIMER BOXES

New Auto-Prime

The original and world's most popular hand-held priming tool. Fast and economical hand held priming with unmatched feel and accuracy. 90230

New, removeable

Tray's built-in flipping surface quickly rights and orients primers—go from box to priming in seconds. Patented elevator pin safely isolates a single primer for priming. Allows most primer brands and types to be safely tray fed.

The convenient hinged cover allows you to individually feed primers if restricted by the primer manufacturer.

Lee Ergo-Prime

Premium hand held priming tool with all the features of the world's most popular Auto-Prime, with a new ERGOnomic design. The Ergo Prime's highly sculpted body fits your hand perfectly, along with a long smoothly contoured finger lever that easily installs the tightest primers. Fingertip operation provides unmatched sensitivity and comfort, especially for older hands. Change primer size in an instant-no tools or disassembly required, simply remove shell holder and swap primer assembly. Powder coated metal body and polished chrome plated lever makes the Ergo-Prime not only the most comfortable, but also the best looking tool made.

Lee Case Trimmer

After a case has been loaded a few times, it will stretch beyond maximum length and must be trimmed. There is no better system to check and trim cases than with the LEE CASE LENGTH GAUGE and CUTTER. You don't need an expensive caliper to set length and never waste even a single case setting up with the cut and try system common to all other brands. The piloted cutter assures the case mouths are absolutely square and true to the case neck. Best of all, the fixed length design assures it will never go out of adjustment.

LOCK STUD

The CUTTER and LOCK STUD works for all calibers. You will need only one. The CASE LENGTH GAUGE (PILOT) and SHELL HOLDER must be ordered as CASE LENGTH GAUGE and SHELL HOLDER for each caliber - see size listing at right. You can trim cases by hand, use an electric drill or the LEE ZIP TRIM.

CUTTER AND LOCK STUD 90110 LARGE CUTTER & LOCK STUD 90401 For .475 and larger cases. Can be used on any case.

THREADED LARGE CUTTER AND LOCK STUD 90468 Large cutter with 8-32 thread shank for use on popular powered case

preparation centers.

CHAMFER TOOL Must be used after Case Trimming. Unique design cuts fast without chatter. One turn does the job. Chamfers and deburrs inside and outside of case necks. Can also be used to remove the crimp from primer pockets of G.I. brass. Works better than tools costing several times as much. 90109

PRIMER POCKET CLEANER Double ended design cleans both large and small primer pockets. Primers can be fully seated for better accuracy and safety. Costs so little and works so well, no reloader can afford to be without one.

90101

CASE CONDITIONING KIT Includes cutter and lock stud, chamfer tool and primer pocket cleaner. 90950

-

90275

CUTTER ONLY

WITH BALL GRIP

Zip Trim Power Head

The Zip Trim rotates your case like a lathe. While your case is mounted, you can quickly trim, chamfer and polish your case. The Zip Trim's hardened steel spindle accepts the case length gauge shell holder or has two permanent mounting lugs and a socket to accept a "C" clamp for a completely portable set-up. 90899

Polishing the cases with steel wool or plastic scouring pad is so much faster than case tumbling. No time is required separating the cleaning media from cases, so no worry of the media sticking to the inside of your cases and no digging the media out of the flash hole.

3 JAW CHUCK

90608

Works with any case from 25 ACP to the largest belted magnums. Three hardened steel jaws gently center the case while the spindle locks the case head. Cases are installed and removed with a fraction of a turn. For use with Spinner Stud (90607) or Zip Trim (90899)

CASE SPINNER STUD

Optional case spinner spindle with drill shank for use with the 3 Jaw Chuck, turns any electric drill into a high speed case polisher/lathe. Also works great to hold cases for neck turning or trimming. 90607

QUICK TRIM

Trim brass to the correct length while chamfering the case mouth

Lee Deluxe Quick Trim Case Trimmer

The Deluxe Quick Trim Case Trimmer quickly and precisely trims your brass to the correct length at the same time it chamfers the inside and outside of the case mouth. No calipers, measurement or adjustment required. Simply install the appropriate quick trim die in your press and start trimming. A click adjustable stop allows trim length adjustment in .001 of an inch increments. Allows the user to shorten case to a uniform shorter length than standard, reducing trimming frequency. Includes snap on chip catcher. **90437**

LEE VALUE TRIM

Same quick trimming and click adjustability as the deluxe version, but doesn't include the inside/outside chamfer blades and we skipped the fancy chrome plating.

90386

DELUXE CUTTER ASSEMBLY 90355 Update your Value Trim adding automatic case chamfering or use to replace a dulled cutter.

Lee Bulge Buster Kit

Assure your mixed brass is bulge free with the Bulge Buster Kit and appropriate Lee Carbide Factory Crimp Die. This push through die adapter will quickly remove the annoying bulge rings that shell holder constrained dies simply can't reach. The Bulge Buster Kit includes extension sleeve, push through punch, catch container and complete instructions. And it's fast - you can reprocess your cases as quickly as you can handle them.

BULGE BUSTER KIT 90487 CARBIDE FACTORY CRIMP DIES, SEE PAGE 8

> Utilize all your brass by removing annoying bulge rings

With the Lee Factory Crimp Die, the Bulge Buster will repair all these rimless cases 90867 380 ACP 90862 10 mm 90862 40 S&W 90416 41 AE 90864 45 ACP 90864 45 GAP 90864 45 WIN MAG

Easily removes crimped in primers from military cases. Guaranteed unbreakable. 22 CALIBER 90103 30 CALIBER 90102

DECAPPING DIE

An absolute must for those who clean cases before reloading. Cases need not be clean nor lubed when using this die. Tough, almost unbreakable decapper easily removes crimped in primers. Fits cases up to .560" in diameter and up to 3.125" long. 90292

REPLACEMENT DECAPPER 90783

OLDER

5 5

UNIVERSAL CASE EXPANDING DIE

Gently flares the case mouth to accept cast bullets without shaving. Works great to prevent damaging the moly and low friction coatings found on today's high performance jacketed bullets. Includes neck plugs for .22 cal through .45 cal. Works on everything from the 22 Hornet to the largest Ultra Mag. 90798

DELUXE PERFECT POWDER MEASURE

QUALITY CONSTRUCTION

This powder measure features a high pressure die cast, diamond-machined body. The precision-machined rotor drum is cast from brass, which is naturally anti-static and spark proof.

ELIMINATES CUT POWDER AND JERKY ACTION

A soft elastomer wiper strikes off the metering chamber rather than cut the powder. You'll be surprised at how smoothly the rotor operates. More importantly, you will enjoy the most uniform of charges.

EASY TO SET & READ MICROMETER METERING CHAMBER

Powder charge adjustment is accomplished with a true micrometer adjustable metering chamber. The metering chamber is aluminum with a black anodized finish. Features a crisp, permanent, laser engraved scale. The brass micrometer thimble is engraved with.O1cc graduations and has a releasable detent lock. With most rifle powders each click is about a 1/10 of a grain, perfect for working up a load.

CHANGING POWDER IS FAST AND EASY

Features easily removable hopper with an on/off valve so you can quickly return unused powder to its original container or switch to another type. The hopper feeds to a pre-measuring chamber allowing precise charges regardless of the powder level in the hopper, eliminates the need for an extra powder baffle.

QUICK CHANGE DRUMS

One of the nicest features is the ability to use the new Lee standard quick-change drums (product # 90453). These low cost drums can be preset to your favorite charge and swapped out in seconds.

PICTURED ON OPTIONAL STAND # 90587, SOLD SEPARATELY

DELUXE PERFECT POWDER MEASURE

90699

No powder measure, regardless of price, has all the features of the Lee Deluxe Powder Measure

PERFECT FOR USE WITH THE DELUXE PERFECT POWDER MEASURE & AUTO-DRUM

QUICK CHANGE DRUM SET features four precision molded nylon drums. Two small capacity for cases as small as the 25 ACP, adjustable to 223 size rifle cases. Large capacity drums adjustable from 223 case to cases as large as the belted magnums. The large drums include an insert to allow reduced capacity charging like the small drum.

All drums are infinitely adjustable within range. No tools required for adjustment. A graduated adjustment key is included with each drum. Each key is marked with .01cc graduations, allowing easy 1/10-grain powder adjustments.

QUICK CHANGE DRUM SET 90453

Powder Measure Stand

Heavy, powder coated steel construction 7/8" mounting hole for all popular measures Includes 3 no slip feet Rock solid mount improves measure consistency Space saving freestanding design is portable and convenient.

Works with other brands of powder measures POWDER MEASURE STAND 90587

Lee Safety Scale

Safety and accuracy are the most important features

This is the only scale that can never get out of adjustment. The beam is made from a very tough phenolic, the same type material used on table and counter tops. Phenolic is tough but, like glass, it can't be bent. Even if dropped you can feel confident that if it did not break it is still accurate. Sensitive and readable to 1/20 grain.

90681

READ THIS IF YOU ALREADY HAVE A COMBINATION BULLET AND POWDER SCALE Try this simple test to see how sensitive your scale really is.

Cut a piece of regular writing paper or this catalog 5/16 inch square. With scale set on zero — drop the paper on the pan to see if it moves. It should read about .1 grain. Keep adding paper squares until it does move. The total number of squares needed to move your scale is your scale's sensitivity. We have seen digital powder scales that are only sensitive to 1/2 grain (FIVE paper squares!) A Lee Safety Scale will move with the first paper.

Lee Powder Measure Kit

Powder Funnel

Fifteen uniformly graduated and proportioned powder dippers. Slide card shows the grains of powder each measure will dispense of every type of powder. Powder measures are inherently safe as they cannot get out of adjustment. That's why powder dippers continue to be the first choice of reloaders who load in small quantities. **90100**

A large, unbreakable funnel that fits all cases from .22 to .45 caliber. Hole in flange permits mounting to the Lee Turret Press, shelf or bench. 90190

Almost as good as a scale! Solves problems common to ordinary drum type measures. Gives you the confidence that your charges will be the most uniform possible.

Lee Perfect Powder Measure

Includes many of the features of the Deluxe Perfect Powder Measure, but the body is molded from an engineering grade polymer. Rotating micrometer adjustable metering chamber and elastomer wiper to prevent powder cutting. Works better than other powder measures priced four times as much. **90058**

FREE STURDY STEEL MOUNTING BRACKET included with each measure

2 RELABING & AUTO-DISK POWDER MEASURE · PRO AUTO DISK POWDER MEASURE

CHARGE CASES While Expanding The **Case Mouth**

Lee Auto-Disk Powder Measure, the world's first case activated powder measure. This design of powder measure has been automatically charging cases since 1982. Measures include four precisely molded glass reinforced charge disks containing 24 cavities. Nothing is more convenient, consistent or inherently safer than fixed cavities. Disks can be changed in seconds and are properly sized and incremented to dispense 3 to 24 grains gunpowder.

"Modern Reloading" and all popular Lee die sets include Auto-Disk volume load data. Simply insert the correct disk and start reloading.

All Lee handgun dies and straight walled rifle cases have included our exclusive powder through expanding dies since the introduction of the Auto-Disk powder measure. If you don't have Lee dies you're still in luck; we offer powder through dies individually.

Lee Auto-Disk Powder Measure

The measure that started it all, mostly unchanged since it was introduced. Automatically dispenses charges while the neck is being expanded and flared. The case itself actuates the measure. No case, no powder, so you'll nver spill a charge. Simple fixed cavity charging. No adjusting or powder scale required when using suggested starting charges. Measure is

actuated during the presses maximum mechanical advantage. This assures the smooth, even action of the measure. Hopper with builtin baffle contributes to the unmatched charge uniformity. Precisely molded, glass reinforced charge disks, accurately meter powder.

LEE AUTO-DISK POWDER MEASURE INCLUDES ALL FOUR DISKS

90578

Lee Pro Auto-Disk Powder Measure

Commercial reloaders or competitive shooters first choice! Elastomer wiper and polytetrafluoroethylene (PTFE) nonstick metal casting make this the smoothest operating measure. Large hopper with integral shut-off valve makes changing powder or disks super convenient. Brass thumbnuts attach the hopper to the body so you can change disks with no tools. Rubber wiper and seal prevents powder shearing and makes it more leak-resistant with fine-grain powders. Increased safety with positive pull-back lever.

The measure is attached to the die with a swivel adapter, allowing easy positioning and quick removal when changing cartridges. Included positive pull back lever reduces the chance of double charge when progressive reloading.

LEE PRO AUTO-DISK POWDER MEASURE INCLUDES ALL FOUR DISKS

REALPHANNES

Both the Auto-Disk and Pro Auto-Disk come with a complete set of four disks. Each disk has six cavities, so you get 24 cavities in all. The chart included on the rear of the instruction sheet lists the capacity of each cavity with every type of powder. If you reduce your charge 10% you can safely use this data without weighing your charge. Fixed cavities are the safest way to meter powder because they can't be misadjusted or get out of adjustment.

AUTO-DISK ACCESORIES

PRO AUTO-DISK UPDATE KIT

Update any Lee Auto-Disk Powder Measure with all the PRO features, except for the teflon coating. Includes oversize hopper and valve assembly with elastomer wiper, swivel adapter assembly for fast and easy transfer between die sets, pullback lever, chain and attachments, solid brass knurled thumb nuts. FREE ADJUSTABLE CHARGE BAR

LEE PRO AUTO-DISK UPDATE KIT 90377

SWIVEL ADAPTER

For fast and easy transfer between die sets. Screws into your die without rotating the measure. Allows precise positioning with firm clamping.

ADJUSTABLE CHARGE BAR

Infinitely adjustable between .28 and 1.6 cc. Lifetime nylon with solid brass, zero backlash micrometer. Easy to set.

ADJUSTABLE CHARGE BAR 90792

DOUBLE DISK KIT (NOT PICTURED)

This kit raises the hopper so you can stack two disks. This not only doubles the capacity of the disks but it makes very fine adjustments possible. Most powders can be adjusted up or down .1 grain with different combinations of disks. Complete listing of combinations, 4 extra disks, screws and risers are included. **LEE DOUBLE DISK KIT 90195**

AUTO DRUM

Case actuated; never spill a charge.

Exclusive elastomer wiper prevents powder shearing, works great with difficult metering extruded powders.

Machined body with labyrinth groove mates to the precision molded nylon drums providing a leak free fit with the finest powders.

Drum is actuated by a steel sector and pinion gear train.

Quick-change hopper has on/off valve to quickly change powders.

Sleek modern design, all gears springs and levers inside the die cast housing.

Same swivel adapter as our famous Pro Auto-Disk powder measure. Makes moving measure fast and convenient.

Double charge disconnector reduces the chance of a double charge on progressive presses.

[Press must have a fixed tool head to use this feature.]

Handgun and rifle drums included.

...

Auto-Drum Powder Measure

Automatic case actuated drum powder measure. Accurately and automatically dispense powder in your favorite cartridge. Two infinitely adjustable drums included. These Quick Change drums will accurately and reliably drop charges from 1 to 80 grains of powder.

POWDER MEASURE RISER

с

Installs between the Lee Powder through Expanding Die and Auto-Disk Powder Measure. Allows convenient use of other brands of dies that have extended adjusting screws and provides clearance for the Lee Safety Prime. **POWDER MEASURE RISER 90041**

Quick Change Drum Set

Quick change drum set features four precision molded nylon drums. Two small capacity for cases as small as the 25 ACP, adjustable to 223 size rifle cases. The large capacity drums are adjustable from 223 case to cases as large as the belted magnums. The large drums include an insert to allow reduced capacity charging, like the small drum.

QUICK CHANGE DRUM SET

POWDER THROUGH EXPANDING DIE PG. 10

Only Lee Dies permit charging the case while expanding the case mouth.

90453

NOTE The Auto-Disk, Pro Auto-Disk and Auto-Drum Powder Measures must be used with the powder through expanding die supplied with all Lee pistol dies, or Lee Rifle Charging Dies (see left). These dies may be purchased individually. Sizes on page 10.

UNIQUE Infinite Heat control

A highly reliable control, mounted away from the high heat of the pot. Eliminates failures usually associated with thermostatically controlled units. Thermal feed back to the infinite control permits heater to put out full power until metal has melted.

Magnum Melter

Large 4" diameter pot allows easy access for the ladle caster. Same high efficiency design that has made Lee pots the most popular. Melt time is less than 20 minutes with just 700 watts. 20-lb. capacity for the longest casting session.

MAGNUM MELTER 110 VOLT

90949

Lee Pro 4-20

Large diameter high capacity pot, holds approximately 20 pounds of lead. Nearly 4 inches of clearance under the spout accepts all brands of bullet molds and most sinker molds. It also includes an adjustable mold guide to quickly and accurately position any mold for pouring.

This second generation design incorporates the famous Lee patented high-efficiency design and dependable remote sensing thermostat, now in a dust tight housing. Long life 700-watt tubular heating element assures quick melting and rapid recovery. New micro adjustable, flow control valve adjusts instantly with a twist of the screw driver. Front mounted low maintenance replaceable valve spout allows instant reseating with a turn of a screwdriver.

| LEE PRO 4-20 | 90948 |

110 VOLT 220 VOLT

High speed melter with an infinite heat control for the serious shooter. Easily handles 4-cavity molds. Takes less than 15 minutes to melt 4 pounds of metal. Same infinite heat control as used on the Production Pot. 500 watts AC only. Guaranteed 2 years. PRECISION MELTER, 110V 90021 EXPORT MODEL, 220V 90024

LEE MOLD MALLET

Features ash hardwood construction. Cut the sprue and release the bullets with one handy tool. Ergonomic design makes it convenient and comfortable to use with long casting sessions. Mallet is 10 inches long.

Lee Production Pot IV

Large, deep pot holds approximately 10 pounds of lead. Melt time is less than 20 minutes. Pour spout up front where it belongs so you can see what you're doing. Infinite heat control. Uses only 500 watts of power during heat-up and a lot less to maintain temperature. Large, stable base for safety. 4" of clearance under the spout is high enough to accept

| all brands of bullet molds a | iu most sinker molus. | |

LEE INGOT MOLD

LEE LEAD LADLE

Use to cast 1/2 and one pound ingots. Perfect for remelting and alloying. Wood handles stay cool. Aluminum mold is lightweight and rustproof. **90029**

A convenient size ladle for bullet casting. Works equally well for right and left handers. Handy for skimming and stirring metal. 90026

WARNING MELTING LEAD AND CASTING LEAD OBJECTS WILL EXPOSE YOU AND OTHERS IN THE AREA TO LEAD, WHICH IS KNOWN TO CAUSE BIRTH DEFECTS, OTHER REPRODUCTIVE HARM AND CANCER. SEE INSTRUCTIONS ON "REDUCING EXPOSURE" SUPPLIED WITH PRODUCT.

LUBRICATION & **SIZING** 35

Lube & Sizing Kit

Fastest and easiest way to lubricate and size cast bullets. Standard 7/8 x 14 threads fit any reloading press. Bullets are pushed through the sizing die nose first, so no special nose punches are needed. Gas checks are automatically seated and crimped in place. Sized bullets captured in the special container. COMPLETE FOR ONE SIZE

BREECH LOCK RELOADER PRESS (90045) PG. 18 AND LIQUID ALOX BOTTLE (90177) PICTURED ARE SOLD SEPARATELY.

Bullets must be lubricated for sizing, order Lee Liquid Alox below, good for thousands of bullets.

Try this with your bullet lubricant

The bullet melts while the Lee Liquid Alox clings tenaciously to the bullet

Lee Liquid Alox

Lee Liquid Alox gives better accuracy because it eliminates leading. The lube coats the entire bullet like a thin jacket and dries to a soft, varnish-like finish that really clings. The dried coating does not degrade gunpowder. Easy to apply; eliminates the need for sizing of most cast bullets. While it works well with all cast or swaged bullets better than any other lube, it works most ecomonically with micro band bullets, which are designed for tumble lubing.

4 OZ. DISPENSER BOTTLE 90177

Quickly and precisely check hardness of your lead alloy. Exclusive conversion chart tells the maximum operating pressure of any lead alloy. **90924**

> INCLUDES calibrated hardened steel ball indenter v" block cradle snaps into standard press ram 20 power 4 lens optical measuring microscope

LUBRICATING BULLETS

Traditional bullet lubricating methods of placing lube only in the grooves are inferior to the modern method of coating the entire bullet with Lee Liquid Alox. This places the lube where needed, on the surfaces that rub against the bore.

Gently shake the bullets in an orbital motion to coat the bullets. If they do not coat completely, add a little more lube.

Spread the bullets onto waxed paper and let dry overnight.

LEE MOLD BLOCKS ARE MADE FROM ALUMINUM BECAUSE OF THE **EXCEPTIONAL MOLDING QUALITIES**

MOLD CAVITIES ARE CNC-MACHINED FOR UNMATCHED ROUNDNESS AND SIZE CONTROL

TRADITIONAL GROOVE This stype of lubrication groove is designed for old style hard lubricants.

MICRO BAND GROOVE FOR LIQUID ALOX #90177 The reduced friction of the micro bands allow a higher velocity with the same pressure as conventional lube grooves.

DOUBLE CAVITY MOLDS

Handles and sprue plate included.

HOLLOW BASE MOLDS

These are available in single cavity only. They all have self centering automatic core pins for the fastest possible molding. Handles and sprue plate included.

SIX CAVITY COMMERCIAL OUALITY MOLDS

These are made for heavy duty volume production. The mold and blocks have steel bushing and alignment pins for lasting precision. Price includes a cam operated sprue plate to eliminate the pounding common to ordinary molds. The sprue plate is hard anodized and held down with wave washers at each end. No finer mold can be purchased at any price. Handles extra.

MOLD HANDLES

Precision steel mold handles fit not only the Lee Six Cavity blocks, but most other brands of one and two cavity molds. Priced low enough so you can have a set for every pair of blocks. 90005

The bullet shank has many shallow grooves for maximum liquid lubricant retention. A great way to make bullets in quantity with minimum time, effort

MICRO BANDS USUALLY REQUIRE NO SIZING

and equipment. More accurate than ordinary cast bullets. The reduced friction of the micro bands gives you more velocity with less pressure.

RIFLING·ENGRAVED·AT·LOADING

The driving bands are large enough to adequately engage the rifling when pushed into the muzzle, and thin enough to easily engrave. They're strong enough to withstand maximum charges without stripping or gas cutting.

UNIQUE CLEANING ACTION You can shoot all day without cleaning your rifle between shots! When inserted into the muzzle, tiny scraping edges are swagged forward on each driving band. These perfect fitting scrapers remove the fouling from the previous shot. EASIER, FASTER TO LOAD It's easy to load straight and true, easier and faster than a round ball with patch. Easily stabilized with very light charges, the R·E·A·L bullet also retains accuracy with maximum loads. Each band is generously tapered to the rear with an angle close to that of a lathe center, so as to center the bullet against the rifle bands. When pushed in, the bullet automatically centers in the bore.

MORE ACCURATE The bevel base of the R·E·A·L bullet contributes to greater accuracy. When the bullet exits the bore, the gas escapes equally around the perimeter of the base. The uniform bevel is resistant to nicks that would permit gas to escape prematurely and cause a jet effect on one side of the bullet.

Load slugs for less than standard trap loads. The LEE DRIVE KEY slug is loaded in standard trap hull with standard wad and conventional folded crimp. Slug loads are produced with any standard shot shell reloading press.

Lee Slug Mold features the exclusive drive key. The drive key positively rotates the slug in rifled shotgun barrels and doubles as a support rib allowing use of a standard trap wad—no need for a support wad or base filler. Sabot wad design outperforms rifled slugs in rifled slug barrels. Velocity and accuracy meet and exceed expensive factory loaded rifled slugs. Molds feature self centering automatic core pins for maximum speed and convenience. Mold is complete with sprue plate, handles and complete instructions with suggested loads. 90281 1 OZ. 12 GA.

Load shotgun shells, steel or lead shot. to look and shoot like new

Lee Load-All II

Lee Load-All II shotgun shells not only look better than those loaded on machines costing hundreds of dollars, but they usually have more uniform velocity and patterns.

Twenty-four shot and powder bushings are included free. The bushings alone can cost several dollars each from other manufacturers- and they're not as accurate as those made by Lee. Only Lee supplies molded bushings.

This is a time proven tool. There are hundreds of thousands in use world wide: in nearly forty years, we have yet to see one worn out. Written two-year unconditional guarantee and a lifetime warranty.
