

Q: How do I change the combination on a Set-Your-Own combination lock model 1520D, 1523D, 1524D, or 1534D?

A:

Here are instructions for changing the combination on your 1523D/1524D/1534D/1534DBBR/1534DWHT/1534DBLU/1534DBLK/1534DPNK combination lock:

1. Open lock and withdraw the shackle.
2. Pull spring loaded metal end cap off.
3. Remove all 4 or 5 combination wheels.
4. **IMPORTANT:** Make sure the red marks remain aligned with Master logo. Install wheels so your desired combination aligns with the Master logo.
5. Snap metal end cap back into place. (Note: If end cap will not mount properly, check wheels to make sure they are right side up.)
6. Close shackle and scramble wheels to lock.
7. Secure your NEW combination in a safe place since you are the only one who knows what it is!

When it comes to quality travel organizers & accessories, Master Lock is the brand you can depend on.
