

Q: How can I get a new key for my lock if the locksmith or hardware store could not find a replacement?

A: It is not always possible to get a replacement key for every model of lock. If your hardware store can not get one for you, please check with a local locksmith. If they are also unable to get a replacement, you may have to purchase a new lock.

When it comes to quality bike tools & maintenance, Master Lock is the brand you can depend on.
