

solar-powered LED WEDGE LIGHT

Versatile Light, Great For All Around Your House
Motion Activated or Always On!

LOCATION, LOCATION, LOCATION!

The Maxsa Wedge Light's unique design makes it perfect for all around your house. Mount it anywhere—from your front door, to your porch—it can even be placed directly on a deck railing or a stair. The Wedge light can be set to continuously stay on and operate as a floodlight, or to activate only when triggered by motion, making it a terrific security light. Use them as single units, or in groups.

INTEGRATED SOLAR PANEL

The Wedge light features an integrated solar panel and metal mounting bracket, making it easy to install and use because there's no separate panel to install. The solar panel charges the batteries during the day. The batteries power the light throughout the night providing enough electricity for the light to activate hundreds of times over the course of an evening, or stay on for hours as a flood light. Absolutely no electrician necessary!

WORKS YEAR ROUND, IN ALL CLIMATES

An IP44 weatherproof rating, sealed lens, and durable construction ensure that your light will provide many years of functionality.

INNOVATIVE MOUNTING SYSTEM

The Wedge Light's innovative mounting system includes a metal mounting bracket and a key which locks the light onto the bracket, making for an easy and secure installation. The mounting system also makes it easy to take the unit down and take it with you wherever you might need a little extra light.

The Wedge Light is a great light to put up around the house; terrific for helping you find your keys by the front door, or for helping you see the garbage cans when you're taking out the trash. It is so easy to put up and take down that it can even be used on an RV.
