

HEX™

PROVEN AND PREFERRED PROTECTION

Protective apparel began with McDavid (okay, suits of armor came first, but nobody does a 4.3 second 40 in an armored suit). It started here and here it remains the industry standard.

Hex Technology is superior, closed cell foam padding, uniquely and permanently bonded to our high quality hDc™ moisture management fabric. This gives every athlete, in any contact or collision sport, the remarkable advantages of protection, durability and confidence. Our Hex Technology has been copied and pirated around the world, but we remain the leaders, the innovators and the preferred choice.

Countless professional and amateur athletes choose to wear McDavid Hex Technology. The Hex marks the spot for authenticity and performance.

Check out an excellent selection of sports & fitness products we offer on our website.
