

MEPRO HYPER-BRIGHT™

Extremely bright day & night sight

Mepro Hyper-Bright™ fixed pistol sight features an extremely bright contrasting colored ring in front sight. Shooters can select from one of three colors ring— green, yellow or orange—for the front sight. Our front sight is illuminated with low light green colored tritium. The contrast in colors of the two components helps the shooter focus on the front sight quicker, which is critical in defensive and competitive shooting.

Proven advantages:

- > Super bright day & night sight
- > No batteries, no switches – always ready for action
- > Fast target acquisition
