

Navisafe Headlamp

220	Navisafe Headlamp	7090017580650
-----	-------------------	---------------

The new Navisafe Headlamp contains all functions needed to make it the Sailor's first choice: a red light to preserve night vision, a white floodlight to light the whole sail, and an ultra-powerful distance light shining up to 70 m plus tilt function for exact and comfortable beam positioning. It weighs only 68 g including the single AA Battery. The Headlamp is IPX6 classified and withstands heavy splashing and rain.

Navisafe Smart Mode Switch:

1. Press and hold for 0.5 s to activate the red light. If the red light is ON for more than 3 PRESS the switch again and the light turns OFF
2. To activate the white light PRESS and HOLD for 0.5 s and activate the red light, PRESS again quickly and enter into white light mode
3. PRESS again quickly to get to the next mode

In ANY mode: PRESS and HOLD for 1.5 s to turn light OFF

- 7 lumens red floodlight
