

This Quick Set Up Guide is for TWS Speakers

TWS Quick Start Guide

NAS and NDS Models

These Bluetooth® speakers support TWS functionality, allowing you to seamlessly play music through both speakers at the same time across rooms. To do so, follow these steps:

1. Turn on both speakers you intend to use.
2. Press the MODE button on the speakers to switch to Bluetooth® mode. The word "BLUE" will flash on the LED screen.
3. Please press the PLAY/PAUSE (TWS) button on one of the speakers and hold it for 3 seconds. The two speakers will connect.
4. Open the Bluetooth® settings menu on your external device and initiate a search for nearby devices. Select speaker name and connect.
5. Begin playback and the audio will play through the two connected speakers.

NOTE: TWS functionality is for two speakers at a time only. It cannot support more than two speakers at the same time.

NOTE: please keep the distance between the two speaker within 3 to 9 feet after TWS pairing optimal connection.
