PRO LABEL WOOD

Trust the process. Trust that the time you put in the cage, on the tee, and hustle between the lines—it is all part of the journey to perfect the art of hitting. Like your game, we work on ours too—every log, every grain, every cut must be perfect or we don't stop working. We don't stop until we have provided you the performance you need to be your best. #TeamRawlings

The Rawlings Pro Label line bats are factory sealed to ensure preferred weight in all climates.

Implemented by MLB to reduce multi-piece failures, a simple drop of ink tells the story of bat performance. Simply put: the straighter the grain, the better durability, the better the performance.

The quality and craftsmanship of the Rawlings Pro Label line is backed with a 30 day warranty.

RAWLINGS IS THE OFFICIAL GAME BALL OF MINOR LEAGUE BASEBALL®

ROM

- Official Game Ball of Minor League Baseball®

COLLEGIATE BASEBALLS

Officially adopted in 2015, NCAA® Divisions I, II and III, and the NAIA® began using Rawlings® flat-seam baseballs after Rawlings' research highlighted an average 26-foot increase in flat-seam baseball distances compared to raised-seam baseballs. The NCAA's own independent testing verified Rawlings' conclusions. According to the NCAA®, while the switch to Rawlings® flat-seams baseballs does increase distance (due to less drag on the ball), there was no change to the baseball's C.O.R. or bat-exit speed.

RED DOT® 3-PIECE TECHNOLOGY

A step above competitor's 2-piece softballs: that is why the best players in the nation choose Rawlings. The inner core uses Rawlings' proprietary dense cell formulation, creating a ball worthy of being the Official Championship Softball of the NCAA® and NAIA®. With the addition of the C-LOK™ adhesive and moisture barrier, the improved pro-leather cover with just the right amount of tack, there is no wonder why Rawlings has a rich tradition in fastpitch softball.

DREAM SEAM® HIGH-DENSITY CORK

For teams wanting the distinctive sound and feel of cork, Rawlings offers a complete line of NFHS®, ASA®, USSSA®, NSA® and ISC™ cork game balls. Made of high-density cork and Rawlings' patented Dream Seam® Technology, they offer the performance you demand while giving a lower cost option in game balls.

RIF® TRAINING BALLS

Rawlings was the originator of RIF® balls designed to reduce the severity of ball impact injuries. Since the original RIF® game balls, Rawlings has expanded its offering to practice-level soft-training balls. These products are great for outdoor as well as indoor training.

SUPERDOT® 3-PIECE TECHNOLOGY

A step above competitor's 2-piece softballs. The inner layer consists of Rawlings' proprietary mixture of polyurethane and isocyanate blended together and perfected in the Super Dot™ formulation over the years for consistent spin and durability. Add to this the C-LOK™ adhesive and moisture barrier second layer technology that locks on the pro grade cover (third layer) to the core and it is easy to see why the Super Dot™ is the #1 selling brand of softballs.

WITH C-LOK™

C-LOK™ plus Rawlings' proprietary dense cell poly-core technology repels moisture and maintains higher compression.

WITHOUT C-LOK™

Balls without Rawlings' C-LOK™ and poly-core combination can absorb moisture and lose compression (go softer).

WASHING GUIDE

DO WASH UNIFORMS PRIOR TO FIRST USE AND IMMEDIATELY AFTER EACH USE. Naturally occurring PH levels in sweat may cause dye migration in first use. We recommend a detergent similar to Tide™ for cold water to help decrease the chance of this happening. Prior to washing in cool water, turning the garments inside out will help preserve Twill, Perma-Print®, and Embroidery. Clasp Velcro® prior to washing may help prevent snagging or picking.

DO NOT WASH UNIFORMS WITH OTHER ITEMS. Bleeding may occur.

DO NOT USE BLEACH. Bleach will deteriorate fabric fibers and may cause color loss.

DO NOT OVERLOAD WASHER OR DRYER. Hang dry is recommended for best results. In the dryer, overloading may cause the uniforms to stick together, especially those with Perma-Print® ink. Remove garments immediately after both wash and dry cycles. To avoid static and lint build-up, use an anti-static agent such as Bounce® Dryer Sheets.

DO NOT EXPOSE UNIFORMS TO HIGH HEAT. Excessive heat is the enemy of your uniform. Heat presses, ironing, dry cleaning, or heat transfers may cause dye migration and may break down fabric fibers. Also excessive heat, especially in dryers, can cause shrinkage above normal tolerances, cause Perma-Print® ink to crack, and Twill to wrinkle. If you use a dryer, please use a “damp dry” or “air dry” setting.

DO STORE IN A DRY, ROOM TEMPERATURE AREA, AWAY FROM DIRECT SUNLIGHT. Excessive sunlight may cause discoloration.

Heavily soiled garments (grass, dirt, clay mud), pre-treatment is recommended

- Spray on products such as Spray'n Wash®, Shout®, or ESPRO® cleaner have been tested with positive results.
- Products such as Stick Stain® or Shout Gel® can be used for stubborn stains.
- For blood stains, it is best to rinse in room temperature water as soon as possible, and if necessary, soak in room temperature water before washing. One of the above pretreatments can also be used, or an oxygen based laundry booster such as Oxi Clean® can also be used.
- For ink stains, use hair spray as soon as possible. Delaying the application of hair spray may decrease results. Spray on stain and rub until the ink is gone. Wash as normal.

MATCHING COLORS:

There is no known process which can positively regulate the final results when cotton, polyester or nylon yarns or cloth are dyed. Even though the finest dyes and quality assurance processes are used, each lot may absorb the color in a different manner and vary in shading when finished. Every possible effort is made to match colors as closely as the peculiarities in dyes and dye action will permit, but the situation is not controllable. All orders are handled by us with the understanding that the purchaser realizes these conditions and accepts

the responsibility for any variations within standard tolerances. Fabric of 100% polyester or polyester blends in dark shades contain dyes that may tint light colors of Twill. Rawlings® will not assume responsibility should this occur. Sublimation: Color differences between sublimated and non-sublimated fabrics may occur. This phenomenon is known as a metameric effect.

HOW TO MEASURE:

Chest - The tape should be placed under the arms level across back muscles and chest. Have the person take a deep breath when reading the measurement.

Waist - The tape should be placed around the waist above the top of the hip bone. It should be positioned approximately where the person wears a belt.

NOTES:

1. Always use a cloth tailor's tape when taking body measurements. Place the index finger and middle finger between tape and body while holding the tape with thumb.
2. For circumference measurements of the body, the tape measure should not be pulled too tight.
3. For garment size, use the tape measurement to the next largest inch.
4. Garment sizing is determined from the actual body measurements. A specific size garment, e.g. size 42, is designed to fit a body with a chest measurement of 42".

The actual size of the pattern and garment will be determined by:

- a. Requirements of the sport (designed for loose or tight fit).
- b. Type of fabric intended for the garment design.
- c. Special garment styles or designs. When the above adjustments have been factored into the pattern, the garment should fit the proper size body as indicated on the size label of garment.
- d. The type and size of pads worn by the player

WASHING GUIDE

DO WASH UNIFORMS PRIOR TO FIRST USE AND IMMEDIATELY AFTER EACH USE.

Naturally occurring PH levels in sweat may cause dye migration in first use. We recommend a detergent similar to Tide™ for cold water to help decrease the chance of this happening. Prior to washing in cool water, turning the garments inside out will help preserve Twill, Perma-Print®, and Embroidery. Claspings Velcro® prior to washing may help prevent snagging or picking.

DO NOT WASH UNIFORMS WITH OTHER ITEMS. Bleeding may occur.

DO NOT USE BLEACH. Bleach will deteriorate fabric fibers and may cause color loss.

DO NOT OVERLOAD WASHER OR DRYER. Hang dry is recommended for best results. In the dryer, overloading may cause the uniforms to stick together, especially those with Perma-Print® ink. Remove garments immediately after both wash and dry cycles. To avoid static and lint build-up, use an anti-static agent such as Bounce® Dryer Sheets.

DO NOT EXPOSE UNIFORMS TO HIGH HEAT. Excessive heat is the enemy of your uniform. Washing too hot, heat presses, ironing, dry cleaning, or heat transfers may cause dye migration and may break down fabric fibers. Also excessive heat, especially in dryers, can cause shrinkage above normal tolerances, cause Perma-Print® ink to crack, and Twill to wrinkle. If you use a dryer, please use a “damp dry” or “air dry” setting.

DO STORE IN A DRY, ROOM TEMPERATURE AREA, AWAY FROM DIRECT SUNLIGHT.

Excessive sunlight may cause discoloration.

Heavily soiled garments (grass, dirt, clay mud), pre-treatment is recommended

- Spray on products such as Spray'n Wash®, Shout®, or ESPRO® cleaner have been tested with positive results.
- Products such as Stick Stain® or Shout Gel® can be used for stubborn stains.
- For blood stains, it is best to rinse in room temperature water as soon as possible, and if necessary, soak in room temperature water before washing. One of the above pre-treatments can also be used, or an oxygen based laundry booster such as Oxy Clean® can also be used.
- For ink stains, use hair spray as soon as possible. Delaying the application of hair spray may decrease results. Spray on stain and rub until the ink is gone. Wash as normal.

MATCHING COLORS:

There is no known process which can positively regulate the final results when cotton, polyester or nylon yarns or cloth are dyed. Even though the finest dyes and quality assurance processes are used, each lot may absorb the color in a different manner and vary in shading when finished. Every possible effort is made to match colors as closely as the peculiarities in dyes and dye action will permit, but the situation is not controllable. All orders are handled by us

with the understanding that the purchaser realizes these conditions and accepts the responsibility for any variations within standard tolerances. Fabric of 100% polyester or polyester blends in dark shades contain dyes that may tint light colors of Twill. Rawlings® will not assume responsibility should this occur. Sublimation: Color differences between sublimated and non-sublimated fabrics may occur. This phenomenon is known as a metamer effect.
