

Rothco Laser Cut MOLLE 2-Point Padded Rifle Sling

Rothco's 2-Point Padded Rifle Sling is equipped with laser-cut MOLLE, making it a must-have tactical item that is both adaptable and functional. The laser-cut MOLLE provides the same great application as standard MOLLE but offers a more lightweight design, which is ideal for a rifle sling. The internal bungee system reduces shock and enhances retention of your firearm. The padded section on the gun sling reduces pressure on your shoulder so you can carry your rifle comfortably.
