

## Rothco Laser Cut MOLLE Plate Carrier Vest

Rothco's Laser Cut MOLLE Plate Carrier Vest is engineered to provide low-profile, lightweight integration to your MOLLE compatible gear. Place your armor plate in the front and back pockets (15" X 11 1/4" X 1") and in the hook and loop pockets on the side of the cummerbund (6" X 7") for maximum protection. The cummerbund is fully detachable and adjustable. It can extend to 56", making it one size fits most. Attach additional pouches and accessories with the laser cut MOLLE compatible straps located on the front and back of the vest and on the sides of the cummerbund (14 rows on the front and back, and 5 rows on the cummerbund). The top 4 rows of MOLLE straps on the front and the back are loop-covered for patch attachment. For added protection, the tactical vest comes with interior air mesh padding. Store your phone, keys, and other small essentials in the top front hook and loop admin-type pocket. The adjustable shoulder straps feature detachable pads for added comfort and hard ABS plastic quick-release buckles. If you want to add a hydration pack, the MOLLE vest includes hydration hose points on both shoulder straps for a convenient source of water while in the field. In case of an injury, the back of the military vest offers an emergency drag handle so your comrade can pull you to safety. Designed with denier polyester and laser cut MOLLE, the armor plate carrier vest is ideally lightweight so you can move freely while in combat.

## Specifications

Property	Value
Brand	Rothco
Product Origin	CHN
Material	Polyester, Plastic
Material Specs	600D Polyester / ABS Plastic
Certification	ISO Certified
Pockets	5
