

Saddleman Facemask Product Information

Although our Saddleman facemasks are not medical grade and are not designed for those on the frontline of the fight against COVID-19 they are effective in reducing the spread of droplets and particles and allow those on the frontline to have a supply of the medical grade N95 masks.

The Saddleman masks are made of a special 3 layer fabric which consists of a water resistant polyester outer layer followed by an integrated 3mm foam layer that helps capture any particles and finally a soft tricot layer towards the face for maximum comfort.

Features

- Washable and reusable (Hand Wash or Microwave to disinfect)
- Made of a unique 3 layer fabric which contains a built in foam filter system
- Water / liquid resistant outer layer for maximum protection
- Made in the USA
- Available in 3 Sizes: Adult Large, Adult Small & Child
- Helps prevent the spread of airborne particles and illness
- The large mask is roughly 10" across the center of the face
- The small & child masks are roughly 8" across the center of the face

Description

Saddleman is helping in the global fight against COVID-19 by doing its part in retooling a portion of its American production facility to product protective facemasks. This helps relieve the supply pressure on the medical facemasks that are desperately needed by our heroic healthcare workers to heal the sick and to protect themselves.

Although our Saddleman facemasks are not medical grade and are not designed for those on the frontline of the fight against COVID-19 they are effective in reducing the spread of droplets and particles and allow those on the frontline to have a supply of the medical grade N95 masks.

The Saddleman masks are made of a special 3 layer fabric which consists of a water resistant polyester outer layer followed by an integrated 3mm foam layer that helps capture any particles and finally a soft tricot layer that is against the face for maximum comfort.

Notes

Saddleman Facemasks are not eligible for returns

Although fabric face masks cannot guarantee complete protection against an airborne virus, these face masks can help protect you from the tiny droplets that spread coronavirus. We urge everyone to practice good hand hygiene and follow social distancing recommendations.
