

6354 ALS® TACTICAL HOLSTER

Model 6354

6354 ALS® TACTICAL HOLSTER

6355 ALS® TACTICAL HOLSTER W/ QUICK-RELEASE STRAP

The Safariland® 6354/6355 are open-top tactical drop-leg holster systems featuring the intuitive ALS® (Automatic Locking System) internal retention. The ALS system automatically secures the weapon once holstered, and keeps it that way until released via the thumb lever. Additionally, the Hood Guard, an external shield over the thumb lever, provides additional safety by protecting the release mechanism against takeaway attempts.

Built for harsh environments, this holster rig is constructed of a durable thermoformed SafariLaminate™ material with a suede lining to help protect the weapon's finish. The drop-leg design stays clear of vest and pack, and silicone gripper strips keep the dual elastic leg straps in place. The holster has the Safariland standard 3-hole pattern and is compatible with the QLS (Quick Attachment System). The leg shroud offers two attachment points for accessories and is designed to also work with the ELS (Equipment Locking System). The Model 6355 version offers a quick-release buckle on the leg strap for easy on / off convenience.

PATENTED

Model 6355: w/Quick-Release

OPEN-TOP HOLSTER WITH ALS® RETENTION

FEATURES
