

TUBE ROPE CONNECT INSTRUCTIONS

How to attach TUBE ROPE CONNECTOR to towables:

1. Pass the TUBE ROPE CONNECTOR's rope loop through the strap loop of your towable's harness strap. It is not necessary for the knot to pass through the strap loop.
2. Pass the plastic connector of the TUBE ROPE CONNECTOR through the rope loop.
3. Pull until tight.

How to attach tow rope (not included) to TUBE ROPE CONNECTOR:

1. Thread the loop of the tow rope up through the bottom of the hole in the plastic connector of the TUBE ROPE CONNECTOR. For larger diameter tow rope, first wet the loop and twist it through the hole in the plastic connector.
2. Pull the tow rope loop over the top of the plastic connector and position into both notches.
3. Secure the tow rope loop by pulling until tight.
