

 **SIDI**<sup>®</sup>

20 **CICLISTA** 20  
**AMERICA**

*Almost 60 years ago sports footwear icon, Dino Signori, along with a small staff of enthusiasts, started by rethinking how trekking boots were made, then moved on to create the first rear entry ski boot. From there he took the first steps in building what is today the premier brand in cycling shoes-Sidi!*

In subsequent years, Dino with his daughter Rosella at his side along with the Sidi design team, have created some of the most groundbreaking designs in cycling footwear. Way back in 1973 Sidi revolutionized the cycling shoe by incorporating the adjustable cleat position. In 1985 Sidi invented the world's first dedicated MTB shoe and followed that by producing the first cycling shoe with a mono-filament Boa buckle. More recently Sidi debuted the Adjustable Heel Security System, allowing riders to customize shoe fit at the heel. In 2016 Sidi introduced another new innovation, the Techno-3 Push system that dials in fit along the entire length of the shoe, adapts the upper to the rider's foot for a customized fit and releases at the push of a button.

As Sidi has grown, so has its manufacturing base without ever losing the essence of what makes a Sidi a Sidi. Sidi shoes are built in limited quantities and Sidi is perhaps the only Italian shoe company that does not source out any aspect of its production process. All Sidi shoes are constructed in Sidi's Italian managed Romanian factory or at its corporate design facility in the boot center of the world, Treviso, Italy.

All of this makes Sidi shoes the ultimate in craftsmanship, fit and comfort. The brand of champion cyclists across the globe.

# SIDI Technology 2020

## TECHPRO MICROFIBER

TechPro is a microfibr PU that is made in Italy. It is considered a highly technological and innovative, eco-friendly synthetic leather suitable for technical and sports products which require high performance levels. TechPro incorporates features of resistance, stability, lightness, transpirability, water-repellency and eco-friendliness. TechPro Microfibrer is Oeko-Tex certified, does not contain harmful substances and respects the limits of the law.

### TECHPRO:

**Tiger, Shot, Wire2, Ergo 5, Drako, Dragon 5**

## MICROTECH MICROFIBER

Microtech Microfibr incorporates features of resistance, stability, lightness, transpirability, water-repellency and eco-friendliness. It is manufactured using the "Water-Tech" water treatment. Lower environmental impact, less noxious emissions into the air and into the work environment and the fact that not solvents, but water-based products were used, is beneficial to the environment as well as the final user.

### MICROTECH:

**Genius 10, Genius 7, Dominator 10, Dominator 7 SR, Zero Gore, Frost Gore**

## POLITEX MATERIAL

The Politex material is constructed of several overlapping layers with different physical and mechanical properties. This compacted PVC is then coupled to two fabrics (knitted fabric and felt) that is then film dyed for long lasting color retention. Politex offers strong resistance to rips, lacerations, stretching and fading. Politex is made in strict compliance with European regulations and is considered a "green" product.

### POLITEX:

**Alba 2, Trace 2, Defender 20 Defender, Swift Air, T-5, SD15**

- DOUBLE TECNO 3 PUSH**
- SINGLE TECNO 3 PUSH**
- TECNO 3 PUSH**
- TECNO 3 SYSTEM**
- ADJUSTABLE HEEL RETENTION DEVICE**
- SOFT INSTEP 4**
- SOFT INSTEP 3**
- SOFT INSTEP 2**
- CALIPER BUCKLE**
- HIGH SECURITY VELCRO**
- RUBBER TOE**
- SIDI HEEL CUP**
- ANTI-SLIP HEEL PAD**
- RS17 SOLE WITH REPLACEABLE TOE INSERT**

## SIDI Lasts

### MEN'S REGULAR WIDTH

- Regular Width
- Standard Men's D width
- Precise fit

### MEGA

- 4 mm wider across the ball of the foot
- More volume, a high instep and a wider heel cup
- Mega lasts are EE o EEE width

### WOMAN'S SPECIFIC

- Tapered last mimics a women's more tapered foot shape
- Narrower across the ball of the foot
- Less volume, on the instep area and a narrower heel cup

## Road

### Shot | Wire 2

The **VENT CARBON SOLE** is handmade of 100% carbon fiber which provides superior power transfer because of its light weight and stiffness. Features an integrated vent for increased air circulation along with a standard 3-hole bolt pattern.

### Ergo 5 | T-5

The **TWELVE CARBON COMPOSITE SOLE** is injected molded carbon fiber in a matrix of nylon that creates a significantly lighter and stiffer sole that is less susceptible to changes because of aging or prolonged usage and features a bold Sidi graphic.

### Genius 10 | T-5 Woman

The **CARBON COMPOSITE 20** is the newest generation of injected carbon composite sole. The injected carbon creates a stiff sole while the nylon acts a barrier to water and temperature change creating a durable stiff sole.

### Genius 7 | Zero Gore

The **MILLENIUM 5 CARBON COMPOSITE SOLE** is constructed from injected carbon fiber in a nylon matrix. This infusion of carbon fiber in the nylon increases sole stiffness and durability, ensuring optimum performance in the face of prolonged use and temperature changes.

### Alba 2 | Studio Air

The **MILLENIUM 4 CARBON COMPOSITE SOLE** is injected molded carbon fiber in a matrix of nylon that creates a significantly lighter and stiffer sole that is less susceptible to changes because of aging or prolonged usage.

## SIZE CHART

CM*	European		US X-Ref.	
	METRIC	MEN	WOMEN	
22	36	3.3	4.8	
22.7	37	4.1	5.6	
23.3	38	4.9	6.4	
24	39	5.7	7.2	
24.7	40	6.4	7.9	
25.3	41	7.1	8.6	
26	42	8	9.5	
26.7	43	8.8	10.3	
27.3	44	9.6		
28	45	10.4		
28.7	46	11.2		
29.3	47	11.9		
30	48	12.7		
30.7	49	13.5		
31.3	50	14.3		

\*To choose the correct size, measure the length of the foot in cm, from the heel to the big toe, as shown.

### Tiger | Drako 2

The **MTB SRS CARBON GROUND SOLE** consists of replaceable tread blocks in the toe and heel attached to a carbon sole. Plus the innovative replaceable MTB plate, designed to prevent sole damage from pedal contact.

### Dragon 5

The **MTB SRS CARBON COMPOSITE SOLE** consists of weaved carbon fiber and nylon. The Sole Replacement System consists of four inserts screwed in, easily removable and replaceable.

### Dominator 10 | Dominator 7 SR | Trace 2 | Frost Gore

The **MTB RS17 SOLE** consists of a Nylon and PU blend. This sole is lighter than the traditional competition sole and has been updated with a more aggressive tread pattern and a replaceable toe tread insert.

### Swift Air

The **MTB COMPETITION SOLE** consists of Nylon and can be fitted with toe spikes on the front for traction in difficult and muddy conditions.

## Outdoor

### SD15 | Defender | Defender 20

The **OUTDOOR SOLE** is a high-performance rubber sole with the correct density for variable trail conditions and has been designed to provide excellent grip and expel mud and debris easily. SD15 has a medium stiff insole where as the Defender/Defender 20 has a firm insole.

### Dimaro

The rubber **VIBRAM MEGAGRIP** is stiff and smooth, creating a perfect balance between stability, grip, and flexibility. The sole has excellent grip on wet and dry surfaces. The Vibram rubber sole has excellent damping capabilities and maintains excellent pedal grip without inhibiting release. The sole is designed to work with all current cleat designs. The midsole is made of EVA.

WARNING! No shoe, apparel, helmet or other protective device can completely protect you in all foreseeable or unusual accidents. Riding bicycles is dangerous. In the event of an upset, collision, or other accident, you may be seriously injured or killed, regardless of the type of protective equipment that you are wearing. Do not expect or depend upon your Sidi shoes, or Suomy helmet to prevent or reduce injury in the event of an accident. Under some rare circumstances, the wearing of protective apparel may actually increase your injury. The only way to certainly avoid being injured while riding a bicycle is not to ride.

### SKYTACASERIES

Engineered and designed to cope with the stresses and elements of **XC** and **Gravel** riding, the Taca lends itself well to any bicycle, with reinforced areas along the

cover exactly where the maximum stress and wear develops. Long life Micro injection inserts make the saddle extremely resistant to abrasions with no compromise to general comfort.

## MOONSERIES

The Moon is a full carbon saddle with an antivibration, self-supporting, full carbon twin shell designed to significantly reduce vibration and reinforce the construction of the saddle. The Moon series is offered in 2 different variations: the Racing model with a very aggressive design, and the Luxury model, with the same shape but slightly softer. A Pilarga version is also available to accommodate preferences in support. The Moon is the ultimate in comfort, lightweight and performance.

**Spas System Technology (SPAS):** 2 pads between the carbon rail and the shells dampen and reduce vibrations. Both carbon shells feature an open U shape; the inner shell is black carbon, while the outer shell is matte black. Innovative construction enhances the saddle's look while maintaining a clean silhouette and improving performance, as it significantly increases the padding space while preserving the same volume, as a result, reduces pressures in the perineal area and ensures ultimate comfort.

**COVER DESIGN SYSTEM™ (C.D.S.):** Seamless technology in construction allows a visual master piece for full 360° total design concept perfection.

## STARSERIES

With the Star family, Astute introduces a new range of ROAD products, an innovative project that owns two international patents, based on an aero-dynamic single shell in nylon-carbon, totally developed along the strategy that makes astute saddles known for both sportsmanship and exquisite design. The curved shell offers a different base for the athlete's sit bones and the "U" open shape shell zone introduces a new standard for ergonomics and aesthetics.

**ASYMMETRIC REAR DESIGN (A.R.D.):** The saddle changes perspective as the rear part becomes asymmetric and it introduces new rules. The materials coming from the different field of luxury with a soft touch and fresh colors introduce a new character which aids in comfort and support for the rider.

**COVER DESIGN SYSTEM™ (C.D.S.):** Seamless technology in construction allows a visual master piece for full 360° total design concept perfection.

## SEALITE VT

### SEASERIES

The demanding pressure of triathlon doesn't just come from the bike; we have had to consider all aspects of this hugely challenging event. The Astute Sea Series is perfect for the discipline.

The Sea is

exclusively designed with a centrally aligned channel with upper padding in the forward portion and a hexagonal shape on the rear. The Draining Top Design System (D.T.D.S) is designed to hide the gap

AST-SEALTE-BK BG  
Black/Black-Gray

with a new microfiber that helps the displacement of water with an Asymmetric Arch Design (A.R.D) on the rear portion of the seat. Available for the first time is a special full carbon integrated rail for a deep off-set, making the Sea the best choice to find the perfect set-up for triathlon races.

## SUNLINE VT

### SUNSERIES

The Sun is a super affordable 100% Italian made saddle constructed with all the same performance standards of our other saddles. Built with a nylon-

carbon shell with memory foam technology and a microfiber textile cover for the best in comfort and performance.

## MISSERIES

MISS represents the right mix of racing product and female-inspired elegance: sinuous and comfortable in the right places, it supports the athlete in giving it their all. Offered with the technological characteristics of its predecessor STAR in terms of structure and finishes, it introduces a new concept of padding with bi-density memory foam and "compact" 250 145 mm dimensions. One of the lightest women's saddles on the market, the LITE version boasts a rail completely in 3K carbon whereas the LINE version is fitted with matt black titanium.

## MUDSERIES

Developed in the world ENDURO Mountain biking series, this saddle has been developed to offer the right support to even the most demanding athletes. With specific padding, a Bumper Integrated System (B.D.S) and compact sizes, we assure a total integration to the rider during their maximum efforts. The construction combines all new design templates with three international patents, lightweight full 3K carbon integrated in the forward section of the saddle, or a titanium V rail finished in satin black (MUD Line).

# SUOMY COLLECTION 2020 HELMETS

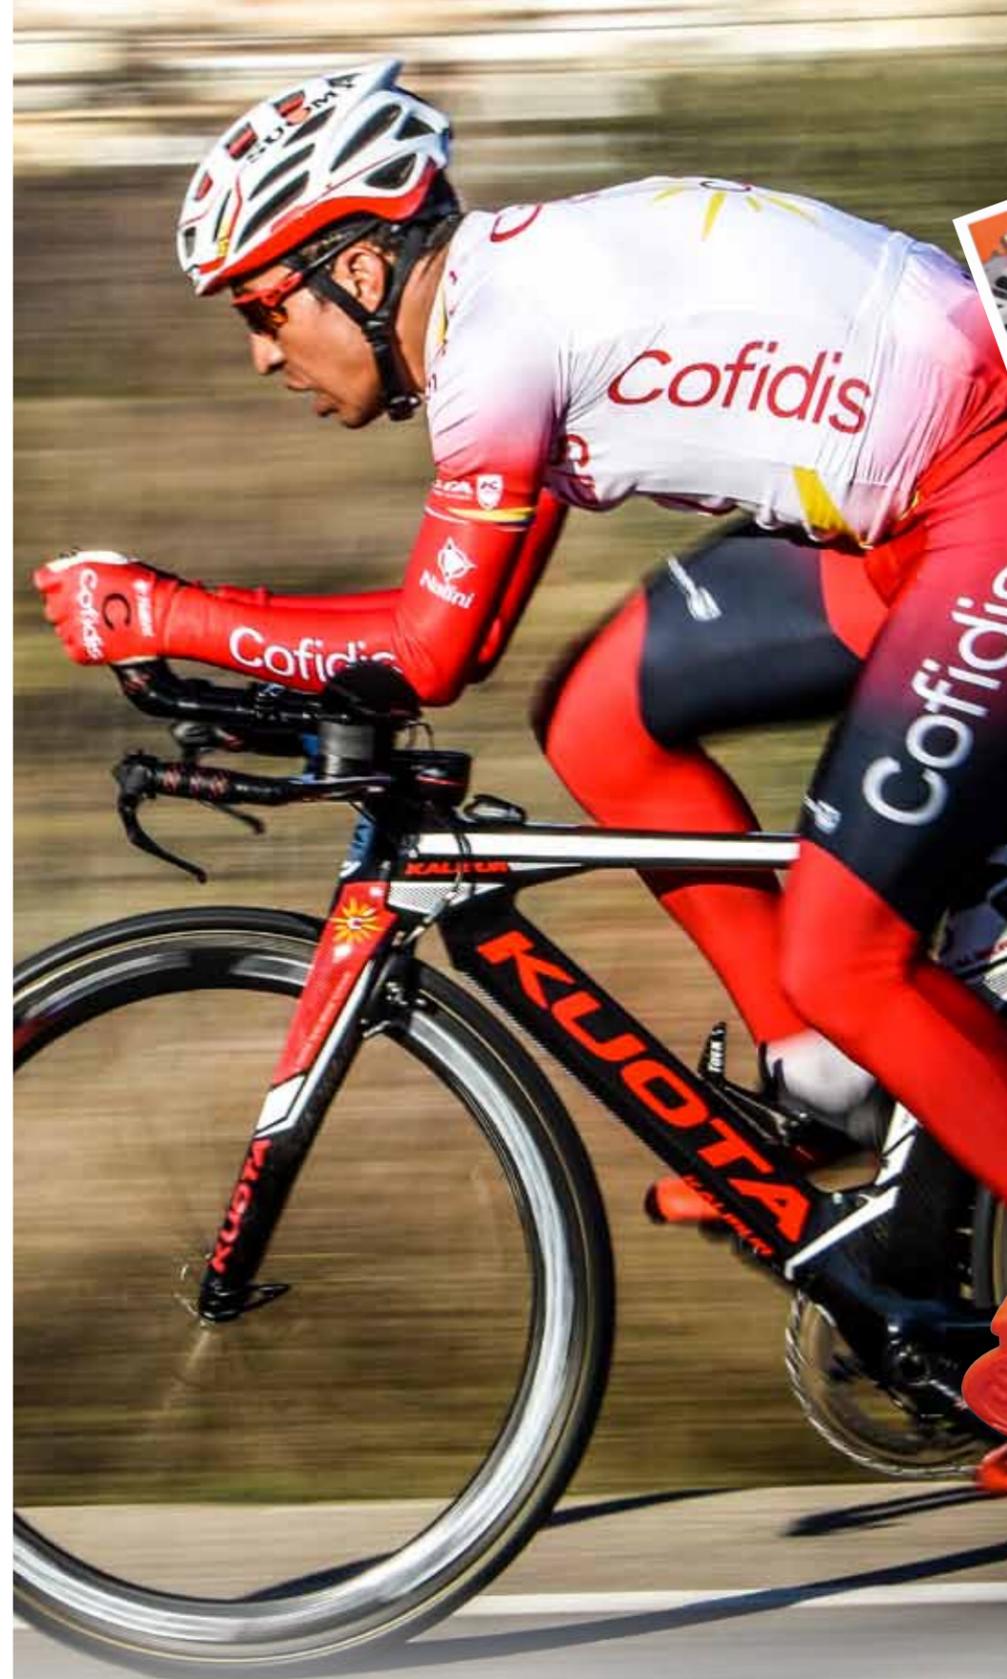

*The birth of Suomy is a story of an Italian family. Having worked for a long time with Yamaha, Umberto Monti, founder of Suomy, becomes the first distributor for Bell helmets in Europe. Being extremely passionate about "Made in Italy", he involves his two brothers, Walter, an Italian national champion motocross rider, and Maurizio, a nuclear engineer and the three together create Suomy. From the very beginning, with its fluorescent red "dot", the brand becomes unmistakable and unique on the heads of riders.*

In a few years, Suomy is recognized worldwide as a market leader, and achieves impressive results with its twelve-world titles in motorcycle sports and offshore boat racing. Over time, the brand is no longer able to remain strictly in the motor world, as global recognition thrusts Suomy into the world

of Italian fashion. Umberto creates a look at the time that was definitely unconventional and innovative, introducing graphics with flowers, glitter and bright colors. Suomy becomes the only helmet brand that migrates from helmets to other fashion products.

Desiring to be part of the global change to creating a more sustainable environment, Suomy moved away from motorsports in order to focus on new products and markets. The first challenge is in cycling, where the three brothers want to create something new that epitomizes the Suomy DNA of "Made in Italy" and the highest quality possible.

Suomy, more than twenty years in the making, is proud to have been a key part of a phenomenal change in motorcycle helmet design and safety. Now the story goes on with the cycling helmets. Products, engineering and designs that will make the "Suomy story", the story of the future.

- ➔ 22 ventilation holes in variable direction to optimizes airflow.
- ➔ Adjustable rear fit system with 5 vertical and 2 horizontal settings.

- ➔ Anti-scratch—anti-fog smoke visor, with chromed mirror treatment, which can be applied also in a "non-use" position without compromising its aerodynamics.
- ➔ The helmets visor can be used also wearing standard glasses underneath. And of course the helmet can also be used without the visor.
- ➔ Removable and washable padding, available in different thickness.
- ➔ Visor is attached with magnets for easy application and removal.
