BLACK

TECNOLOGY

· The rubber sole is stiff and smooth, features that create a perfect balance between stability and flexibility required by the gravity speciality. The sole has an excellent grip on the pedal and on the ground, allowing the mud and dirt to not get stuck.

· The sole is for flat and SPD pedals. Users of the SPD pedal can easily adapt the sole to different pedals with cleats by removing a specific insert held by two screws.

· The closure system is simple and fast, the laces allow to adjust the closure while the Velcro keeps the laces blocked and offers extra protection from debris.

· The tip is protective and scratch proof

· The heel is equipped with a collar made of elastic material that prevents dust and debris to entry.

SIDI DESIGN SERIES or S.D.S. is a collection of products that are designed by Sidi's engineering/design team but are produced by outside suppliers. Sidi prefers to keep it very clear as to what items are manufactured at its own factories and what items are sourced to outside suppliers. In this way the integrity and value on the Sidi brand is maintained for all its clients and rider's while at the same time providing the market some interesting new products from the new SIDI DESIGN SERIES brand.

Check out an excellent selection of cycling clothing we offer on our website.
