TECNOLOGY

VENT CARBON SOLE

-- The VENT CARBON Sole features a light and replaceable heelpad in polyurethane to improve walkability and a replaceable integrated toe pad/vent cover. The key benefits of the VENT CARBON Sole are not only superior power transfer, because of its light weight and stiffness, but also warm weather comfort. The VENT CARBON Sole is designed with an integrated vent and air channels for heat dissipation and air flow. The vent can be opened or closed for 4-season comfort. The VENT CARBON Sole is handmade exclusively of carbon fiber in a weave pattern oriented at opposing angles that maximize stiffness while allowing for a small degree of controlled flex in the toe area. This carefully designed flex biomechanically relieves stress on the plantar tendon and helps promote circulation. The VENT CARBON Sole features a standard 3-hole drilling pattern, printed 10 mm lateral and fore/aft cleat alignment scale as well as the Look Memory Eyelet for easy cleat alignment and replacement. For triathlon, the vent also serves as a water drain, dramatically improving foot comfort after a wet transition.

TECNO-4 PUSH SYSTEM

-- TECNO-4: evolution of Sidi technology applied to rotors, the mechanism has a single rotor to reduce the shoe's weight, guarantees a micrometric and precise closure. To highlight is the speed of release of the tension, definitely improved compared to the other Sidi mechanisms. Another technology belonging to the Italian brand Sidi is the possibility to replace all the TECNO-4 components.

HIGH SECURITY HOOK AND LOOP FASTENER

-- HIGH SECURITY HOOK AND LOOP straps with integrated locking polymer teeth, that engage onto each other when the strap is closed. This feature makes the closure more secure and the strap becomes unmovable.

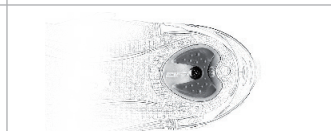

INTEGRATED HEEL

-- The HEEL is integrated, with new design and light weight, reinforced to avoid deformations after prolonged efforts and pressures. Anatomically shaped, it stabilizes and supports the foot while pedaling. The REFLEX inserts on the heel provide greater safety to the athlete on the road, helping to signal the presence of the cyclist in conditions of poor visibility.

REPLACEABLE ANTISLEEP HEEL PAD

--For walkability, Sidi cycling shoes include a replaceable polyurethane heel pad.

Microfibr Techpro

MICROFIBRA TECHPRO is a microfiber PU Made in Italy. It is considered a highly technological and innovative, eco-friendly leather suitable for technical and sports products which require high performance levels. TECHPRO MICROFIBER incorporates features of resistancy, stability, lightness, water-repellency and eco-friendliness.

TECHPRO MICROFIBER has a Hydro and anti-mold treatment, which eliminates the onset of molds and bacteria. TECHPRO MICROFIBER is Oeko-Tex certified, does not contain harmful substances and respects law restrictions.

SUOLA VENT CARBON 16

The VENT CARBON SOLE features a light and replaceable heelpad to improve walkability in polyurethane and a replaceable integrated toe pad/vent cover. The key benefits of the VENT CARBON SOLE are not only superior power transfer, because of its light weight and stiffness, but also warm weather comfort. The VENT CARBON SOLE is designed with an integrated vent and air channels for heat dissipation and air flow. The vent can be opened or closed for 4-season comfort. The VENT CARBON SOLE is handmade exclusively of carbon fiber in a weave pattern oriented at opposing angles that maximize stiffness while allowing for a small degree of controlled flex in the toe area. This carefully designed flex biomechanically relieves stress on the plantar tendon and helps promote circulation. The VENT CARBON SOLE features a standard 3-hole drilling pattern, printed 10 mm lateral and fore/aft cleat alignment scale as well as the Look Memory Eyelet® for easy cleat alignment and replacement. For triathlon, the vent also serves as a water drain, dramatically improving foot comfort after a wet transition.
