UPPER	VENTED POLITEX UPPER
SOLE	TWELVE CARBON COMPOSITE SOLE

TWELVE CARBON COMPOSITE sole is made with two different materials blended together, nylon and carbon fibre. It is made out of injected Carbon Fiber in a matrix of Nylon. The Nylon used doesn't absorb water and doesn't lose rigidity in hot or humid weather or as it ages. The result is a significantly lighter and stiffer sole.

TECNOLOGY

TWELVE CARBON COMPOSITE SOLE

.. TWELVE CARBON COMPOSITE sole is made with two different materials blended together, nylon and carbon fibre. It is made out of injected Carbon Fiber in a matrix of Nylon. The Nylon used doesn't absorb water and doesn't lose rigidity in hot or humid weather or as it ages. The result is a significantly lighter and stiffer sole.

SIDI HEEL CUP

.. Reinforced cup that stabilizes and supports the heel. Anatomically shaped plastic, reduces heel slip and provides increased power transfer. Provides additional foot protection in the event of a crash.

REPLACEABLE HEEL PAD

.. For walkability, Sidi cycling shoes include a replaceable polyurethane heel pad.

Materiale Politex

The "politex" material is constructed of several overlapping layers with different physical-mechanical properties, the compacted PVC is then coupled to two fabrics (knitted fabric + felt) that is then film dyed for long-lasting color retention. "Politex" offers strong resistance to ripping, laceration, stretching and fading. "Politex" is made in strict compliance with European regulations and is a totally "green" product.
