

T - 5 AIR WOMAN

<b>SIZE</b>	36-37-38-39-40-41-42-43
<b>UPPER</b>	VENTED POLITEX UPPER
<b>SOLE</b>	CARBON COMPOSITE 20 SOLE
	

COLOUR

GREY / YELLOW / BLACK	
-----------------------	--

The CARBON COMPOSITE 20 SOLE is in nylon and injected carbon fiber. The nylon keeps the technical features unchanged over time. The result is a light and stiff sole. The central part of the sole is graduated, with millimetric scale, to facilitate the correct fixing of the cleats. Equipped with replaceable polyurethane heel.

TECNOLOGY

**TWELVE CARBON COMPOSITE SOLE**

-- TWELVE CARBON COMPOSITE sole is made with two different materials blended together, nylon and carbon fibre. It is made out of injected Carbon Fiber in a matrix of Nylon. The Nylon used doesn't absorb water and doesn't lose rigidity in hot or humid weather or as it ages. The result is a significantly lighter and stiffer sole.

**SIDI HEEL CUP**

-- Reinforced cup that stabilizes and supports the heel. Anatomically shaped plastic, reduces heel slip and provides increased power transfer. Provides additional foot protection in the event of a crash.

**REPLACEABLE HEEL PAD**

-- For walkability, Sidi cycling shoes include a replaceable polyurethane heel pad.

**Materiale Politex**

The "politex" material is constructed of several overlapping layers with different physical-mechanical properties, the compacted PVC is then coupled to two fabrics (knitted fabric + felt) that is then film dyed for long-lasting color retention. "Politex" offers strong resistance to ripping, laceration, stretching and fading. "Politex" is made in strict compliance with European regulations and is a totally "green" product.
