

TRAIL CAM TECHNOLOGIES

RANGE CONTROL – Adjustable motion sensor allows the camera to be configured for short, medium and long range activation.

HYBRID CAPTURE MODE – Capture high resolution still images and shoot video clips simultaneously.

RETINA – Superior low light performance for extended night time range.

MATRIX – Advanced blur reduction dramatically reduces blur effects resulting in sharper, clearer images.

REFLEX – Ultra-fast trigger speed, Never miss a crucial moment.

MULTI-ZONE – Covers multiple zones of angle and distance, maximizing the camera's triggering accuracy.

GEO-TAG – Track and recall all your favorite locations with optional GPS tagging.** ** Optional GPS coordinates do not appear on data stamping

TRIAD – Hi-Res Still Images / HD Video recording with audio / Time-Lapse camera.

QUICK SET – Sets up in seconds with pre-programmed options.

SECURE LOCK – Secure Lock offers password protection rendering the camera access nearly impossible.

BURST – Rapid-fire burst mode (1-9 exposures per triggering).

ENERGY – Completely re-engineered to optimize energy efficiency. Prolongs battery life allowing it to extend up to one year on a set of batteries.* * Actual field life will vary based on user settings and environmental conditions.
