## Rod Holders Surface Mount P04-091W, P04-0111W, P04-011W

Thank you for purchasing a quality Taco Marine product. Assembly for these rod holders is simple and quite obvious as shown in the drawing below. All you will need to assemble and adjust the rod holder is a standard (#2) Phillips screwdriver.

- 1) Firmly tighten down bolt once you have positioned the rod holders (hardware not included on P04-011W and P04-091W)
