

Repair & Warranty

If you have a Tasco product that requires service or repair, you will need to determine the date the product was manufactured. Tasco products manufactured before 9/1/2002 may not contain a code for the year of manufacture.

Identifying new Tasco product

Old Tasco products may not have a code for the year of the manufacture, but new product does. Check to see if there is an alpha code of the year the product was produced. It will be located in one of these two places. Older product, if coded, will have the code with year then month. JS99-3, for example, would mean March of 1999.
