## Series 5 Jacket

Our top of the line touring jacket for all climates. Waterproof and breathable construction with direct core ventilation by way of Pipeline vents, and the patented Aqua-Barrier™ hood and a removable thermal liner means you will be comfortable in all weather conditions.

Black/Hi-Viz

- Shell constructed using highly abrasion-resistant 600 denier Carbolex® polyester fabric, 1680 denier ballistic polyester in the elbows
- Pipeline venting with pinch vents provide ventilation when open and waterproof protection when closed
- A total of 11 intake and exhaust vents for maximum air circulation
- Aqua-Barrier™ Under-The-Helmet hood to help eliminate seepage while riding (U.S. patents #8,156,573 and #7,779,485)
- Accordion stretch panels in the back and elbows for increased flexibility and comfort
- Phoslite® reflective protection help increase nighttime visibility
- Microfiber-lined collar and cuffs
- Adjustable sleeve take-up straps at forearm and bicep for a custom fit and to help secure elbow armor
- Newly designed CE-approved Armadillo® armor in the elbow and shoulder, with revised articulated triple-density back protector
- Waterproof, breathable Rainguard™ barrier
- Removable thermal liner
- Zippered chest map pocket, fleece-lined hand warmer pockets, internal pouch, mobile media pocket, and dual zippered fanny pack
- Adjustable waist belts with TPR pulls help fine-tune the fit
- Includes 8" jacket/pant zipper attachment with pant side included
- Waterproof front bellows cargo pockets
- Collar anchor
- Durable ESO™ two-way main zipper closure with dual wind flap

## Jacket

Black/Grey

A rugged textile touring jacket made with 600 denier polyester main body and 1680 denier polyester impact zones. Two shoulder vents and two rear exhaust vents, combined with mesh panels, mean this jacket is suitable for warmer climates. The jacket also features a waterproof liner and a zip out thermal vest.

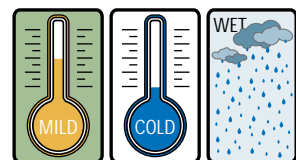

- Carbolex® 600 denier outer shell material
- 1680 denier ballistic polyester in the shoulders and elbows
- Shoulder vents with pinch vent openings provide excellent ventilation and keep the vents open
- Two mesh lined chest pockets also double as vents
- Two rear exhaust vents
- Dual-zippered fanny pack
- Action back rear panel for extra comfort in the riding position
- Phoslite® reflective piping, reflective panels, and Tourmaster's signature reflective rear triangle help increase nighttime visibility
- The microfiber-lined collar and cuffs are soft, yet durable
- Adjustable, elastic snap sleeve takeup straps at the forearm and bicep help secure elbow armor and material
- CE-approved armor at the elbow and shoulder with an articulated triple-density back protector
- Waterproof, breathable Rainguard® barrier
- Removable thermal liner
- Hand warmer pockets, internal pouch pocket, and mobile media pocket
- Adjustable waist belts with reflective pulls help fine tune the fit
- Includes a jacket/pant zipper mounting point
- Collar anchor
- ESO™ zippers

## Jacket

Black

A textile touring jacket with multiple vents and a waterproof / breathable liner. Thermal vest can be removed when the temperatures get warm.

- Shell constructed with 320 denier polyester/nylon blend fabric for a unique finish and feel
- 100g polyfill insulated zip-out vest liner for added warmth when needed
- Built-in waterproof and breathable Rainguard® barrier
- Microfiber-lined mandarin collar and snap-lock zippered cuffs for added comfort
- Action back design provides comfort and increased range of motion
- Includes a detachable zip-off sweatshirt style hood
- Zippered arm vents pull cool air in, while backside zippered vent draws hot air out
- Mesh lined chest pockets double as vents when left open
- Zippered hand pockets, chest pockets, inside chest map pocket, inside mobile device, and pouch pocket
- Dual zippered fanny pack doubles as a vent when left open
- Equipped with durable ESO™ zippers including locking main zipper
- Hook and loop forearm adjustment straps
- Adjustable waist belts for a custom fit
- Reflective piping and rear reflective panel help increase nighttime visibility
- Newly designed, removable Armadillo® CE-approved armor in the elbows and shoulders, plus a triple-density back protector
- Includes 8" jacket/pant zipper attachment with the pant side included

## Series 3 Mesh Jacket

Hi-Viz/Black

A sport length textile and mesh jacket with a removable waterproof liner.

- Armor-Link mesh material combined with 600 denier polyester in the impact areas creates a well-ventilated garment that helps keep the rider protected
- Comfortable mandarin-style collar
- 360° reflective piping and Tourmaster signature reflective rear triangle helps increase nighttime visibility
- The microfiber-lined collar and cuffs are soft yet durable
- Adjustable hook and loop sleeve tabs at the forearm and bicep help secure elbow armor and material
- Removable CE-approved armor at the elbow and shoulder with an articulated triple density back protector
- Removable waterproof liner for inclement weather
- Hand warmer pockets, internal pouch pocket, and mobile media pocket
- Adjustable waist belts with TPR pulls help fine tune the fit
- Rear stretch panel accommodates an optional 8" jacket to pant zipper (connection zipper not included)
- YKK® zippers

## ARMADILLO® CE GROUP 2 ARMOR

### SHOULDER/ELBOW PROTECTORS

- Constructed from rugged lightweight polyurethane for maximum impact absorbing protection
- Polyurethane foam construction with memory characteristics allows the armor to form around shoulder and elbow
- The form and outline shape of the armor is designed to work with the rider, not against
- Ventilation for breathability
- CE level 2 certified (EN1621-1:2012) in ambient, cold (T-) and hot (T+) conditions

### BACK PROTECTOR

- Constructed from rugged lightweight polyurethane for maximum impact absorbing protection
- Polyurethane foam construction with memory characteristics allows the armor to form around shoulder and elbow
- The form and outline shape of the armor is designed to work with the rider, not against
- Ventilation for breathability
- CE level 2 certified (EN1621-1:2012) in ambient, hot (T+) conditions

## ARMADILLO® CE GROUP 1 ARMOR

### SHOULDER/ELBOW PROTECTORS

- Constructed from rugged lightweight polyurethane for maximum impact-absorbing protection
- The form and outline shape of the armor is designed to work with the rider
- Ventilation for breathability
- CE level 1 certified (EN1621-1:2012)

### BACK PROTECTOR (NON CE APPROVED)

- Constructed from dual-density lightweight foam
- The form and outline shape of the armor is designed to work with the rider
- Flex grooves built in to enhance articulation and improve comfort
- Ventilation for breathability

## KNOX® CE CERTIFIED ARMOR

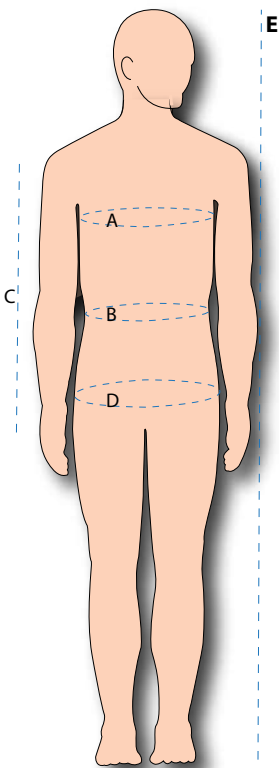

### LITE SHOULDER/FLEXIFORM ELBOW PROTECTORS

- A perfect balance of performance and comfort
- CE level 1 certified (EN1621-1:2012 L1)
- Engineered in three dimensional form using energy absorbing flexible PU material
- Finish is smooth on both sides, and fine edges give the armor an almost unnoticeable feel
- Fully vented for breathability
- Flex grooves for improved articulation, reducing rider fatigue

### ADVANCE X BACK PROTECTORS

- Lightest CE approved back protectors on the market
- Made in Britain by KNOX®
- Made from a three-layer construction with a unique lightweight polypropylene honeycomb core
- CE level 1 approved (EN1621-2:2003 L1)

## Battery Powered Heated Leather Glove

Heating Elements

- Four-level push button 7.4v design
- Supple and abrasion-resistant 0.7-0.8 mm goatskin leather used to construct the backhands, palms, fingers, and forchettes
- Microfiber overlays incorporated into the palm thumbs for added durability
- Ergonomically positioned gauntlet zipper pockets comfortably store battery packs
- 5mm memory foam padded knuckles and accordion stretch fingers provide added protection without sacrificing comfort
- HiPora<sup>®</sup> waterproof, breathable membrane to block out moisture
- 80g 100% polyester insulation keeps the cold out and warmth in
- Fleece lining for a warm and luxurious fit and feel
- Touchscreen compatible index fingers and thumbs
- Dual-closure gauntlet design keeps the warmth in and the elements out
- Reflective piping on outside of gauntlet cuff helps increase nighttime visibility
- Battery life ranges from 2.2 hours on high to 8 hours on low
- Surface temperature ranges of 135°/100%, 120°/75%, 105°/50%, 90°/25%
- Includes two (2) 7.4v 2.0Ah rechargeable lithium-ion batteries and dual charger (packaged separately)

# Synergy<sup>®</sup> 2.0 Electrically Heated Liners

## Replacement and Optional Accessories

Part # 88-631

### SINGLE RHEOSTAT CONTROLLER

Large knobs are easy to adjust with gloves on. Five adjustable heat settings. Black connector plugs into heated garment while red connector goes to power lead. 19" L

Part # 88-612

### V-SPLIT CONNECTOR

Creates two extensions coming off Power Lead Harness. Use with SAE Coaxial Adaptor to create connection for battery tender and heated garment. 10" L

Part # 88-622

### 12-VOLT DC ADAPTOR

Provides a direct connection from your heated Synergy garments to an accessory port. 18" L relaxed 38" L extended

38" Length Part # 88-601  
70" Length Part # 88-624

### POWER LEAD WIRING HARNESS

Connects to the red positive (+) and black negative (-) battery terminals while the opposite end connects to the heated garment. 15-Amp fuze max. 38" and 70" lengths available.

Part # 88-613

### EXTENDED V-SPLIT CONNECTOR

Creates two powered extensions coming off Power Lead Harness. Use with SAE Coaxial Adaptor to create connection for battery tender and heated garment. 57" L

Part # 88-634

### V-SPLIT ADAPTOR GEN 1

Allows first generation Synergy<sup>®</sup> heated apparel to connect to rheostat controller. 10" L

Part # 88-623

### COILED POWER LEAD EXTENDER

Allows rider additional room to maneuver when connected to bike, UTV, snowmobile, ATV, or other Powersports vehicles. 15" relaxed 38" extended

Part # 88-620

### BMW SOCKET ADAPTOR

For use with BMW accessory port to power Synergy<sup>®</sup> heated apparel up to 5 amps (over 5 amps must use battery wiring harness connection). 10" L

Part # 88-619

### SHORT EXTENSION CABLE

A heavy-duty cable that allows 7" of extension to a connector cable.

Part # 88-611

### THIGH-MOUNTED LEG BAND

Allows rider to secure their Tourmaster Synergy<sup>®</sup> rheostat controller to their thigh for convenient access. 25" relaxed 32" extended w/ 3/4" hook-and-loop adjustment

Part # 88-618

### SHORT EXTENSION CABLE II

A heavy-duty cable that allows 7" of extension to a connector cable with male connector at each end.

Part # 88-621

### BATTERY TENDER ADAPTOR (SAE/Coaxial)

	50%	105°F	4.5-6 Hours
	25%	90°F	7-10 Hours

#### CHARGING BATTERIES

Simply plug in charger to wall socket and connect battery to charger. When all indicator lights stop flashing, battery is fully charged.

#### SUGGESTED USE

Plug in charged battery to connection cable on jacket/vest. To turn on battery, press and hold on/off for several seconds until light comes on (if light doesn't turn on, the battery needs charging). When on power starts at 100%, keep on high setting for five to ten minutes to warm up the garment. After the desired temperature is reached, turn the battery down to 50% for a full day's use outside. Turn off the battery during extended breaks or indoors to extend your usage time.

#### CAUTION

In extremely cold conditions, 100% power is needed, be aware that the battery will lose power after three hours. It is strongly recommended to purchase an extra battery for extreme cold conditions.

#### CARE INSTRUCTIONS

- Disconnect and remove battery from the garment's power lead wiring harness.
- Remove temperature control (only on garments using the large battery pack).
- Machine-wash on the gentle or delicate cycle using the warm-water setting (water temperature below 50°F) and a mild detergent.
- **Do not use bleach.**
- Remove from washer and hang/air dry.

**⚠ NOTICE:** Do not wring out or twist the garments to dry. This will damage the heating elements.

**⚠ CAUTION:** Do not tumble dry. Do not iron or dry clean.

Self-Contained Storage Pouch

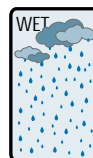

Pant Rear View

### JACKET FEATURES:

- Waterproof and breathable ripstop nylon shell with sealed seams is rated MVM 5000 for maximum breathability
- Features an Aqua-Barrier™ under-the-helmet hood to help eliminate seepage in the collar area U.S. Patent #8,156,573 and #7,779,485
- Self-contained storage pouch allows the jacket to stuff into itself for convenient storage
- Chest map pockets feature waterproof zippers, Tourmaster Scoop Vent System and a mesh backing so they can be opened for ventilation when appropriate
- Three large waterproof bellows pockets maximize carrying capacity
- Waterproof zippered underarm exhaust vents allow warm air to exit
- 3M™ Scotchlite® reflective piping and Tourmaster's signature reflective triangles help increase visibility at night
- Sized to be worn over motorcycle riding apparel
- Includes a jacket to pant zipper attachment that matches perfectly with the Tourmaster Sentinel Rain Pants
- Shock cord waist adjustment seals the sweep, providing a tailored fit
- Full wind flap and hook and loop main closure keeps moisture sealed out

### PANT FEATURES:

- Waterproof and breathable ripstop nylon shell with sealed seams is rated MVM 5000 for maximum breathability
- Polyester mesh lining enhances air circulation and comfort
- Waterproof/breathable stretch material panels above knees provide flexibility and comfort
- High-density nylon seat panel provides added strength and minimizes slipping
- Ergonomic, four-panel knee design provides increased comfort in the riding position
- Two zippered hand pockets for convenient storage
- 3M™ Scotchlite® reflective panels increase nighttime visibility
- Sized to be worn over motorcycle riding apparel
- Includes a pant-to-jacket zipper attachment that matches perfectly with the Tourmaster Sentinel 2.0 Rain Jacket
- Elastic waistband and high-rise rear panel seal out the elements
- Extra long zippered and gusseted leg cuff with hook and loop flap closure allows for ease of dressing

# OUTDRY® TECHNOLOGY

## The OutDry® Technology

OutDry® new technology truly revolutionizes the current standard membrane construction technique in waterproof footwear.

OutDry® is not just “another membrane in the market”: The OutDry® waterproof, breathable membrane is applied directly to footwear uppers, eliminating the need for ‘bootie’ construction.

In fact, the OutDry® new patented lamination process allows the membrane to perfectly fit and seal the upper, eliminating all possible water entry points to really keep water out of your shoes.

OutDry® greatly enhances the comfort and performance of footwear, especially if compared with the standard waterproof lining ‘bootie’ system.

Until now, all waterproof shoes included a ‘bootie’ system: a sock-shaped lining made of a waterproof and breathable membrane, and separated from the upper layer, leaving an empty space. By this decades-old system, in rainy or snowy conditions, although not reaching the foot, water penetrates and remains in between the ‘bootie’ and the upper. The soaked shoe becomes much heavier, and the membrane breathability is extremely reduced due to the layer of water stagnating in the empty space between the ‘bootie’ and the upper.

Conversely, with OutDry® technology, the membrane is steadily bonded to the upper inner side and there is no space in between. Water remains out of the shoe, and the breathability is constantly maintained.

## OutDry® Advantages

### Extreme Waterproofness

The OutDry® system moves the waterproof barrier from the internal lining to the external upper: the water stays on the outer surface of the shoe, and your feet remain dry. No more experience of the unpleasant humid feeling, typical of footwear with waterproofing lining (bootie system).

### Superior Breathability

The OutDry® membrane is specifically engineered for foot protection. It has very high water vapor permeability, certified by the primary international testing facilities. The complete absence of any seam-sealing tapes, enables the system to exploit 100% of the waterproof barrier surface's water vapor permeability, thus increasing overall shoe breathability.

### Unmatched Comfort

The OutDry® system leaves a much larger volume of dry air between the foot and the waterproof barrier; this dramatically reduces the risk of condensation from excessive perspiration, and helps to maintain a stable skin temperature of the foot (by eliminating the loss of heat caused by direct conduction: foot - lining - cold water).

### Perfect Fit

The OutDry® system uniformly seals the upper's inner surface with an ultra-thin waterproof barrier. There are no folds, no seams, and no seam-sealing tape. This eliminates potential points of friction with the foot, and consequently decreases the risk of blisters. Blistering is the #1 cause of foot discomfort when riding under extreme conditions.

### Lighter All Day

Thanks to the OutDry® system, water cannot penetrate inside the upper and stagnate between the upper and the lining; you no longer need to carry this excess weight around your feet. Exertion is reduced and performance increased. Moreover, the OutDry® system insures the upper material absorbs less water and dries much faster.

### High Quality and Durability

The materials and processes utilized by the OutDry® system are engineered for durability in extreme conditions, and maintain their characteristics for the entire lifetime of the footwear.
