

Flex Neck Lighters

This Flame Burns Harder Than The Wind Blows

Its bendable neck, dual flame and all metal construction gives you the power and flexibility to fit into tight spots and flame through stiff winds.

Great For

Lighting Candles

The long flexible neck is ideal for lighting candles in jars and the narrow gauge head is small enough to reach into tight spots.

Lighting Outdoor Items

Wind-resistant dual-flame technology keeps this flame burning strong even in a stiff wind making it ideal to light outdoor items such as tiki torches, grills, lanterns, etc.

Lighting Campfires

A flexible neck precisely positions the flame in any direction to make lighting a campfire easier.

Wind Resistant Dual Flame

Wind-resistant dual-flame technology keeps this flame burning strong even in a stiff wind making it ideal to light outdoor items such as tiki torches, grills, lanterns, etc.

Adjustable Flame Dial

An adjustable flame dial on the end of the Flex Neck Utility Lighter lets you easily control the flame height, providing extra flame height when needed.

Child-Resistant

Patented safety button for peace of mind.

Butane Refillable

For optimum performance of every Zippo Flex Neck Lighter, we recommend genuine Zippo butane fuel. Always refill in the position shown above. Place the butane fuel nozzle into filling valve and depress with firm, even pressure. Wait at least 2 minutes after refueling before using.

Features

Flexible Neck

Light any hard to reach item with our Flex Neck lighters, offered in two sizes.

- 1) Flex Neck: 4.8" Neck
- 2) Flex Neck XL: 13" Neck

Two Colors

Available in two colors where both options have a rugged metal construction. The black Flex Neck Utility Lighter has a slip-resistant rubber grip.

Size Comparison

See the size difference between the Flex Neck and the Flex Neck XL.

Oversized Hanging Loop

Hang wherever to have whenever you need it.
