

Zippo Eagle Lighters

The eagle design lighters are created using Zippo's various imprint methods; color image, photo image, emblem, laser engrave and auto engrave. These unique designs have been placed on several different lighter cases such as; High Polish Blue, Brushed Chrome, High Polish Brass, and Black Ice®.

All Zippo windproof lighters are American made in our Bradford, PA factory.

Imprint Methods:

360° Laser Engrave

Using computer programming, Zippo's newest process 360° laser engraving, seamlessly circumnavigates a lighter entire surface. Bringing laser engraving process to a new level.

360° MultiCut

Zippo artists meticulously render each line in the designs pattern, using a new laser engraving method to fill the design.

Emblem

Image is die struck onto various metal substrates such as brass, aluminum, and pewter.

Photo Imaged

The newly enhanced photo imaging process offers a higher level of detail than any other process.

Color Image

State-of-the-art printing method allows Zippo to imprint multiple colors or full-photographic representations.

Engraving

Zippo has two processes for engraving: auto and laser engrave. Auto engrave is performed by skilled artisans to inscribe an image into the product using creative fill patterns. A dimensional effect can be achieved by using directional fill patterns. Laser engraving is computer programmed to generate an accurate replication of an imprint.

Features:

Case

Standard case shape featuring rounded corners and top with a flat bottom. A five-barrel hinge joins the top and the bottom.

Insert

Standard insert with 16 holes in the chimney (8 per side).

Bottom Stamp

Bottom stamp with Zippo logo from the period authenticates this lighter as genuine Zippo.

Packaging

Unless otherwise stated, every Zippo windproof lighter is packaged in the 'one box'. The patented 'one box' is attractive, easy to handle, and designed to display more of the lighter than ever.
